Site Category: Palaeontological

SiteComments:

EnviroMatrix is appointed as ECO at the Senekal Waste Landfill construction site. Dr Gideon Groenewald is the Palaeo recovery permit holder (See attached). Unfortunately we are no longer working together and I am unable to make contact with him. He is not answering e-mail or phone messages. See attached a photo of approximately 9.5m tree that is within the construction footprint. We found partial sections of 6 more within the construction footprint. All these fossilised trees is currently in-situ. We had GPS and photograph them as per permit requirements. Can I remove them from the construction site and transport them to Bloemfontein Museum (Jennifer Botha-Brink). Please advise?

Damage Types:
