Page No: 1      **SiteAutoID:** 34038

**CommonName:**

Point Q

Physical Type: Open Site

BroadAgeCategory: LSA

Site Category: Shell Midden

**Directions:**

This point is on the northern edge of the driveway/open area and represents shell disturbed by the pipe trench carrying the water pipe.

**SiteComments:**

Not very much shell on the surface but it is clear that sub-surface shell middens are present here. As with the shell at Point Q, these middens may extend beneath the campsite facilities.

Organic Artefact Types: Marine Shell

**DetailsOfCulturalMaterial:**

Dominated by *C. meridionalis* but also including occasional other species

Damage Types:
