Page No: 1      **SiteAutoID:** 34053

**CommonName:**

Point K

Physical Type: Open Site

BroadAgeCategory: LSA

Site Category: Shell Midden

**Directions:**

The scatter lies on and slightly eastwards of a low sand ridge with low to moderate density bushes.

**SiteComments:**

Although not a very dense scatter, this one is quite extensive. This scatter is in a similar location to the in situ material noted near the campsite and may also have extensive subsurface deposits.

Organic Artefact Types: Marine Shell

**DetailsOfCulturalMaterial:**

It includes *C.granatina*, *S. granularis*, *S. argenvillei*, *S. barbara*, *C. meridionalis* and occasional *Burnupena* sp..

Deposit Info: Shell
