Page No: 1      **SiteAutoID:** 34065

BroadAgeCategory: Historical  
Site Category: Ruin > 100 years

**Directions:**

Located to the north of VLVL7.

**SiteComments:**

Additional ruins – possibly outbuildings associated with the main/large structure. Bricks similar to those described for VLVL7 are among the ruins. The structure includes vertically planted beams with what appear to be devices for tethering livestock, possibly horses and hence at least part of this structure was possibly used as a stable. These features certainly require further investigation by a historical archaeologist.
