SiteAutoID: 34197

BroadAgeCategory: Historical

Site Category: Structures

SiteComments:

A small packed stone feature with an iron post at one corner remains above the current FSL. The post has a loop on the top of it. A similar post was found to the south of the Coleta Cove valley just hammered into a bedrock outcrop. Three concrete foundations and one in stone are located very nearby but are within the current FSL.

Damage Types:
