	Project	
	CaseNID	
	Coords	-34.054722, 20.897139

Page No: 1 **SiteAutoID:** 34314

CommonName:

Field 5

Site Category: Artefacts

SiteComments:

Field 5 was not visible from the Basryhoogte road, but when we walked from the bentonite concentrations in Field 4 to Field 6, we discovered another concentration of bentonite in a small depression between the two fields. We called this Field 5 and it contained a very high concentration of stone tools.

Damage Types:
