	Date	01/10/2012 - 12:57
	Project	
	CaseNID	48800
	Coords	-31.478972, 19.057694

Page No: 1 **SiteAutoID:** 34430

Physical Type: Overhang

Site Category: Rock Art

SiteComments:

A small shelter formed by overhanging boulder in the bottom of the valley. It contains a bedrock groove, as well as two portable grooved stones, one uncovered by a porcupine hole. The ashy deposit is badly churned. Three rows of red finger daubs, in a thick red pigment applied to a black surface. A number of thin red lines. A single red geometric.

StoneArtefactNotes:

It contains a bedrock groove, as well as two portable grooved stones.

Deposit Info: Ash

Deposit Disturbance:

The ashy deposit is badly churned.

Damage Types:

Details of Rock Art:

Three rows of red finger daubs, in a thick red pigment applied to a black surface. A number of thin red lines. A single red geometric.
