

Archaeological Site Report	SiteNo	VLZ001
	Site Name	Van Zoelen's Laagte 001
	Date	07/04/2006 - 07:33
	Project	
	CaseNID	
	Coords	-28.371944, 24.704639

Page No: 1 **SiteAutoID:** 34443

BroadAgeCategory: LSA

Site Category: Artefacts

SiteComments:

Area 1 : The Area is characterised by widely dispersed scatters of Later Stone Age remains. On average scatters approximate 6 x 6 m² in size with artefact ratios in the region of ? 4:1 (artefacts: m²). Artefact scatters seem to be largely restricted to the surface or with very shallow stratigraphic depth; they may thus well be representative of lag deposits.

Damage Types:
