	Site Name	Konkoosies 010
	Date	01/04/2012 - 10:52
	Project	
	CaseNID	48896
	Coords	-28.881680, 19.568810

Page No: 1 **SiteAutoID:** 39839

AlternateName:

Site 5

Site Category: Artefacts

SiteComments:

This is another scatter of ostrich eggshell fragments, located on top of a ridge covered by red dune sands. The sand is being eroded out by wind, exposing the rock base and cultural material covered by the sand. A few possible quartz flakes were also observed in the area on the dunes.

Stone Artefact Types: Quartz

Organic Artefact Types: Ostrich Eggshell

Damage Types:
