BroadAgeCategory: LSA, MSA

Site Category: Artefacts

SiteComments:

Eight pieces of LSA Cape coastal Khoisan pottery, two pieces of ostrich eggshell and some fragmented and dispersed shellfish remains were located on a steep sandy slope extensively cleared and disturbed area in the south western portion of the study area. Four of the potsherd were burnished while two pieces were unburnished. At least three vessels are represented on the site. some human animals bones was also found. MSA quartzite core was found in the gravel road overlooking the site. The site is in a severely disturbed context.
