Page No: 1

SiteAutoID: 42067

AlternateName:

Site 4

Site Category: Archaeological

SiteComments:

This is an extended Middle Iron Age site with the key feature being the grain bin stand found scattered over the area. The site is immediately northwest of the dam on Overvlakte 125 MS, and was probably disturbed during construction of the dam – some features may be below water level. The pottery is identified as Transitional K2 facies.

Manufactured Artefact Types: Pottery

Damage Types:
