	CaseNID	
	Coords	-26.207570, 27.808309

Page No: 1 **SiteAutoID:** 45181

AlternateName:
VLK-4

Site Category: Building

SiteComments:

VLK-4 consists of a single building constructed with face bricks that was daubed with mud plaster. This resulted in the building having a strong vernacular character. The roof of the building is of corrugated iron.
40 The architectural heritage specialist who assessed this building, Mauritz Naudé, indicated that it may have been an old waenhuis or stables.

Damage Types:
