SiteAutoID: 52587

AlternateName:

S.35-046

Site Category: Structures

SiteComments:

The site represents a single storey sandstone house, a sandstone barn, and two stonewalled enclosures most likely used as livestock pens identified and recorded on Mooifontein 35 IT Portion 2. These structures are collectively known as a werf - a term signifying the space surrounding a homestead in which outbuildings, gardens, orchards, small livestock pens or coops and a family cemetery or kerkhof may be present. There are several fields around the werf. Contemporary use of the house was noted. In addition, contemporary additions such as a metal window frame and bricks were recorded

Damage Types:
