Site Category: Structures

**SiteComments:**

S.34\_13. This homestead consisted of one kraal and several dilapidated structures. The structures were constructed using varying building material. The majority of structures were stonewalled and circular, while some were rectangular and constructed using concrete. The area around this homestead is overgrown suggesting that it has been abandoned for an extended period of time. Material culture remains found in the homestead were limited to un-diagnostic potsherds.

Damage Types:
