Page No: 1 **SiteAutoID:** 88370

AlternateName:
2430DC-PGS036

Site Category: Structures

SiteComments:

FOUNDATIONS OF MAIN BETA MINE STRUCTURES: There are very few traces of the foundations. (See the list of buildings, which were demolished by the TGME mine after 1986, in the above text) The current remains consist of that of the electric substation /compressor house 50 metres to the north of the main Beta shaft. The shaft has recently been opened up and is being prepared for the planned mining activities. Further associated with the site is the remains of the ore bin, foundations of the footbridge over the Blyde river and the main waste rock dump of the Beta Mine.

Damage Types:
