Graveyard 02

Site Category: Burial Grounds & Graves

SiteComments:

Graveyard 02 (GY02) is demarcated with a fence and is located on the edge of former mining activities to the north-east of the Project Area. It holds at least nine visible graves of which the majority are those of children. More unmarked graves may exist. Some of the graves are fitted with cement headstones with no inscriptions. One of the graves is fitted with a piece of iron plate with holes punched in the plate which spell out the following name: • 'Seliena Mogidi Gemsbokspruit' It is highly likely that all the graves in GY02 are older than sixty years.

Damage Types:
