Site Category: Shell Midden

SiteComments:

Shell midden deposits visible on soft sands on the dune cordon/crest on the sea side of the coastal track. Lots of fragmented shellfish, including Black Mussel and limpets (*C. granatina* and *S. argenvillei*), some whelk and White sand Mussel. 1-2 quartzite flakes & a fragment of ostrich eggshell (OES) shell midden deposits also visible in the road. Quartz scraper and broken quartzite cobble in road.

Damage Types:
