Site Category: Building

**SiteComments:**

Archive Import History: Landskroon was settled by Jan Holsmit in 1691: the present house was built by Pieter De Villiers, in whose family it remained for over a century. The main gable is dated 1769, and is an example of the florid type surprisingly elaborate for so early a date: it contains two casement-windows side by side instead of the more usual single window. The casements on the ground floor and their shutters are old: the entrance-door is modern. The building adjoining is thought to be an earlier dwelling-house of about 1740
