Site Category: Building

**SiteComments:**

Visual Description: A rectangular house, 2 rooms deep, but with a roof of only 7 m span. The end-gables have been clipped, but the square and pedimented front gable, dated 1854, is an excellent example of its type; the 8-panelled door and the sashes date from the same time. The veranda is later and the back of the house has been altered. Corrugated iron roof has been replaced by thatch. Catalogue: Paarl, No: A06.15
