BroadAgeCategory: Historical

Site Category: Building

**SiteComments:**

Waterfalls farm complex occurs on the 1959 aerial photographs and part of the complex predated 60 years in age, if not more. Part of the farm complex appears to have the original structures, while other parts, are more recent (fig.14). The original buildings appear to be made from the pre-ordered corrugated iron houses that were popular in the late 19 th and early 20 th century. The farm will not be affected.
