SiteComments:

A rocky hill just east of the southern part of Alternative 3 had two archaeological sites associated with it. One was a small stone structure located at the base of a small rocky hill on its northern side. It is 2 m by 4 m and the walls are 1 m high. A sheet of corrugated iron nearby suggests it may have been in use not too long ago. Also a small white glass cosmetic bottle nearby but no other artefacts. The second site was a light scatter of quartz artefacts located on the summit of the hill.
