Page No: 1      **SiteAutoID:** 129868

Physical Type: Open Site

BroadAgeCategory: Colonial

Site Category: Archaeological

**SiteComments:**

A stone-walled wind break built on top of a dolerite hill and with flaked quartz artefacts and ostrich eggshell fragments inside it. It is a semi-circular structure that may have functioned to protect people from wind or was perhaps used to hide behind while looking out for prey. This site had quartz artefacts and ostrich eggshell fragments associated with it. Several small circular structures were also noted.

Stone Artefact Types: Quartz

Organic Artefact Types: Ostrich Eggshell

**DetailsOfCulturalMaterial:**

A stone-walled wind break built on top of a dolerite hill and with flaked quartz artefacts and ostrich eggshell fragments inside it.

Damage Types:
