BroadAgeCategory: Historical

Site Category: Structures

**SiteComments:**

The remains of a well-built rectangular structure of concrete are located here. The structure measures approximately 13m by 4m and comprises concrete foundations, large sections of concrete outer walling (though they no longer standing, the walls would originally have been 1.5m high) and small sections of a concrete division wall. This latter wall divides the structure in two. Available evidence indicates that the structure was a reservoir. This evidence includes several metal pipes along the base of the structure and rubber pipes at the tops of the walls.

**DetailsOfCulturalMaterial:**

Reservoir
