Page No: 1      **SiteAutoID:** 130425

BroadAgeCategory: LSA, MSA

Site Category: Artefacts

**SiteComments:**

Large area with exposed calcrete and low density of artefacts based on size and morphology dating to the MSA and LSA. MSA artefacts made mostly from quartzite and other fine-grained material with the LSA almost exclusively on jaspelite and quartzite. MSA artefacts consist of pointed flakes and blades and LSA mostly microlithic and miscellaneous.

Stone Artefact Types: Quartzite

Damage Types:
