Physical Type: Rock Wall

**Orientation:**    **W(m):**  
W                      5.00

Site Category: Rock Art

**SiteComments:**

The paintings are on a south-west facing rock face without a significant overhang and may get sun in the afternoon. All are in red ochre and are faded to very faded. One animal is relatively clear and could be either an eland or a domesticated cow or bull. Another could be a feline and there is also a rectangle of smeared paint above the animals. The panel measures about 400 x 300 mm.

Deposit Info: Sandy

Damage Types:

**Details of Rock Art:**

All are in red ochre and are faded to very faded. One animal is relatively clear and could be either an eland or a domesticated cow or bull. Another could be a feline and there is also a rectangle of smeared paint above the animals. The panel measures about 400 x 300 mm
