	Site Name	Surface scatter
	Date	24/11/2020 - 13:27
	Project	
	CaseNID	
	Coords	-31.474783, 26.345667

Page No: 1 **SiteAutoID:** 132100

Physical Type: Open Site

BroadAgeCategory: MSA

Site Category: Archaeological

SiteComments:

A surface scatter of weathered Middle Stone Age stone artefacts were observed at the entrance gate to the proposed area. The stone artefacts mostly occurred in the farm road and within the exposed donga areas. They comprised mainly of blades, flakes and cores manufactured from hornfels and shale raw materials.

Stone Artefact Types: Hornfels

Damage Types:
