

Archaeological Site Report	SiteNo	KSP018
	Site Name	Kronos Solar Park
	Date	01/09/2015 - 15:39 to 01/12/2020 - 15:39
	Project	
	CaseNID	274685, 274753, 274855, 341739, 341740
	Coords	-30.003722, 22.356222

Page No: 1 **SiteAutoID:** 132277

AlternateCode: **AlternateName:**
J096 HKP2011/002

BroadAgeCategory: LSA, MSA

Site Category: Artefacts

SiteComments:

LSA and MSA exposed on the surface because of the borrow pit. MSA seems fresh, presumably got covered quickly. An erosion gully reveals artefacts in a layer just beneath the calcrete and very dense scatter within the erosion gully itself. There used to be a fossil equid tooth here (see Orton 2011) but this has disappeared.

Damage Types:
