Site Category: Building

SiteComments:

Three bay low-pitched saddle-roofed house with gable end facing the street. Verandah with ogee roof on twin wooden posts is a later wrought-iron fence. Door has a twelve-paned fanlight .6x6 paned sash windows with louvred shutters. Unfortunate modern concrete wall on the right of the house. A well-kept interesting house of local architectural value.

AdminComments:

Building could not be located on this street and it is difficult to find and the coordinates may not be accurate.
