**CommonName:**

Site 1

Site Category: Burial Grounds & Graves

**SiteComments:**

This is a site containing at least 16 graves, but since the grass cover is very dense it was not possible to get an accurate count. Two of the graves have granite headstones and dressing and all the others are stone packed without headstones. Only two surnames were identified, being Mmabache and Tshwene. The dates of death of these two individuals are respectively 1970 and 1978. All the others have no information and therefore have an unknown date of death. This means that two of the three categories of graves were identified, being those without a date of death (called unknown graves) and those younger than 60 years. Unknown graves are handled similarly to heritage graves (older than 60 years).

Damage Types:
