**SiteComments:**

Muishond Rivier 161, Kabeltouw Pass. Sparse disarticulated skeletal remains of a small tetrapod, probably comprising the tusks and limb bone of a small dicynodont therapsid (e.g. Eodicynodon), embedded in fine grey-green sandstone. Linear subhorizontal tetrapod burrow (c. 15 cm wide) nearby (< 2m) at the same horizon.

Damage Types:
