**AlternateName:**

SITE 27

Site Category: Burial Grounds & Graves

**SiteComments:**

The site comprises a black cemetery containing 22 graves. Fourteen of these are stone concentrations and one has bricks for a dressing while seven have upright stones at the head and foot of the graves. Two of the graves have cement headstones on stone concentrations. From information found on the headstones, it is evident that the graves from this cemetery include the deceased of the Jafta family. The site appears to have been a farmworker cemetery.

Damage Types:
