Site Category: Burial Grounds & Graves

SiteComments:

Some 100 meters south of the proposed building site on portion 18 there exist a cemetery of farm labourers. Some graves have recent headstones while may are unmarked. At present there is a dispute between the farm owner and farm labourers regarding the rights to continue their burial practices here. At present the cemetery appears to be untended and in a bad state of repair. New graves in the forefront with older marked and unmarked graves in the background.

Damage Types:
