Site Category: Burial Grounds & Graves

**SiteComments:**

This is a site containing at least 25 graves (Figure 12). These are all stone packed and only some have headstones, also made of stone. None of the graves have any legible information. Therefore only one of the three categories of graves was identified, being those without a date of death (called unknown graves). Unknown graves are handled similarly to heritage graves. The graves are associated with remains of houses further to the south. These remains however consist of nothing more than a few piles of stone.

Damage Types:
