AlternateName:

Site 2

BroadAgeCategory: MSA

Site Category: Artefacts

SiteComments:

Site 2, the site is located on the farm Zwartkop and consists of a high concentration of artefacts scattered mostly on the northern side of Mooskop. Raw material is abundant in this area consisting of Quartzite, Chert, Banded Iron Stone and Rhyolite. Artefacts consist of diagnostic MSA tools and includes amongst other prepared cores and tools with facets on the striking platform. The tools are well preserved and do not show much weathering and contain clear diagnostic features.

Stone Artefact Types: Quartz, Quartzite

Damage Types:
