Page No: 1      **SiteAutoID:** 140430

**AlternateName:**  
CLB 7 (Site 7)

Site Category: Stone walling

**SiteComments:**  
This is the location of a much-weathered semi-circular stone wall (dry-packed walling). It is not easily discernible because of dense undergrowth and grass. It possibly relates to the single pottery sherd at site CLB 6. It is in very poor condition.

Damage Types:
