	Project	
	CaseNID	
	Coords	-30.833333, 30.450000

Page No: 1 **SiteAutoID:** 140480

AlternateName:

LSC6

BroadAgeCategory: MSA, LSA, LIA

Site Category: Artefacts

SiteComments:

The site is situated on a small hill at the base of the development area. The general area is relatively flat and situated in a confluence of several annual streams. The artefacts date to the MSA, LSA and LIA. The site has a potential deposit, however the artefacts appear to be in a secondary context. The MSA component consists of several flakes and cores. The LIA artefacts consist of several sherds

Damage Types:
