CommonName:

Site BRME1

Site Category: Building

Directions:

Site BRME1 is situated approximately 130m west of the Gqaga Abstraction Point (Gqaga AP / GAP).

SiteComments:

Landscape topography distinguishes the site locale from the abstraction point, being situated partly up the steep slope from the abstraction points' riverbed locale. The site may well pre-date 60 years of age, but the exact date thereof is unknown, implying that the site may well be formally protected under the NHRA 1999. The site comprises of an old school building, but seemingly at present in disuse – school tables are stacked inside classrooms, but the structure is dilapidated and doors and windows have been removed. The school yard is fenced, incorporating also a few newer structures, but the fence is not well kept.

Damage Types:
