Page No: 1      **SiteAutoID:** 140856

**CommonName:**

Site BRME4

Site Category: Rock Art

**Directions:**

The site is situated approximately 220m east of the proposed line route.

**SiteComments:**

Site BRME4 is characterized by a small wall of no more than 0.8m in width covering a crevice in the natural stone outcrops to create a cave-like enclosure of approximately 3x5m. The floor of the cave-like enclosure is covered with silty washed-in material, ashy white dung deposits and more recent dung, indicating fairly recent use of the site. No residential or artefact remains were found in association with the site; inferred to have been solely used for stock keeping purposes.

Damage Types:
