Page No: 1 **SiteAutoID:** 16489

CommonName:

Main cave formation

Physical Type: Cave, Overhang

Orientation:

S

W(m):

80.00

D(m):

10.00

H(m):

30.00

AlternateName:

Boomplaas 2

Site Category: Rock Art, Artefacts

Directions:

Below Boomplaas 1 - very obvious formation visible from road.

SiteComments:

Series of indeterminate marks and paintings as you enter along the slight overhang from the left - other more definite paintings in main shelter

AdminComments:

Lots of dassie faeces and small dassie skulls - amazing amount of them.

Stone Artefact Types: Quartz, Quartzite, Silcrete, CCS, Ochre

Manufactured Artefact Types: Pottery

DetailsOfCulturalMaterial:

Same general artefact scatter as main site

Damage Types:

Details of Rock Art:

Red indeterminate marks on the left - quite visible on the day due to water pouring down walls from rain. In the main cave on the right are some humans and antelope - obvious clear ones in red but scrappy slightly up and into the cave. Others are in black and dark red at bottom right. Other scrappy remnants around and photographed.
