Dear Interested and Affected Party,

NOTIFICATION OF RESUBMISSION OF TWO BASIC ASSESSMENT PROCESS

**THE PROPOSED BASIC ASSESSMENT FOR PAULPUTS WIND ENERGY FACILITY SOUTH (PTY) LTD
132KV GRID CONNECTION AND ASSOCIATED INFRASTRUCTURE**

AND

**THE PROPOSED BASIC ASSESSMENT FOR PAULPUTS WIND ENERGY FACILITY SOUTH (PTY) LTD
SUBSTATION AND ASSOCIATED INFRASTRUCTURE**

Paulputs Wind Energy Facility (RF) (Pty) Ltd ('PWEF'), a wholly owned subsidiary of WKN Windcurrent SA (Pty) Ltd, was granted environmental authorisation for the 300MW (75 turbines) Paulputs Wind Energy Facility (WEF) and its associated 132kV OHPL on 11 December 2019 by the Department Forestry, Fisheries and Environment (DFFE) (Reference No. 14/12/16/3/3/2/1120). As part of the original Environmental Impact Assessment (EIA), three alternative OHPL options (A, B and C) and three alternative onsite substation options (A, B and C) were assessed. The Competent Authority (CA), DEFF, chose to only issue a favourable authorisation for the preferred OHPL option 'C' and onsite substation option 'A'.

To comply with the Renewable Energy Independent Power Producer Procurement Programme (REIPPPP) bidding requirements, the abovementioned 300MW Paulputs WEF is being split into the 150MW Paulputs South WEF and the 150MW Paulputs North WEF (being split as part of a separate amendment application). The authorised OHPL option 'C' and on-site substation option 'A' will be used for Paulputs North WEF and a new authorisation for additional electrical infrastructure is now required to connect Paulputs South WEF to the National Grid.

In effect of the above, Paulputs South (the Applicant) intend to apply for two separate Environmental Authorisations for the construction and operation of the proposed development, which includes: A 132 kV, double circuit, loop-in/loop-out Grid Connection and 4.4 ha substation yard comprising: 1.2 ha on-site substation, 1 ha for offices, 1.2ha battery energy storage systems (BESS), and 1 ha permanent laydown area.

On 03 August 2021, a combined application for both the grid connection and substation was submitted, and two separate Environmental Authorisation reference numbers was requested from the DFFE. The DFFE acknowledged this application in compliance with the NEMA EIA Regulations on 04 August 2021. The same day, this application was then rejected stating that a combined application could not be accepted. As a result, Arcus have resubmitted the same reports and appendices, however split the combined application into two:

- **Application One:** A 132 kV, double circuit, loop-in/loop-out Grid Connection; and
- **Application Two:** 4.4 ha substation yard comprising: 1.2 ha on-site substation, 1 ha for offices, 1.2ha battery energy storage systems (BESS), and 1 ha permanent laydown area

Public Participation for the **Draft Reports remain unchanged. No changes have been made to the contents of the Draft Reports.** The Draft Reports have been made available for public review and comment from the **Monday, 02 August 2021 to Thursday, 02 September 2021 (both days inclusive)**. The reports are subjected to compliance in accordance with EIA Regulations, 2014 (as amended) of the National Environmental Management Act, 1998 (Act 107 of 1998 – NEMA). These reports and applications have been submitted under Chapter 4 (basic assessment). Moreover the processes take into consideration Chapter 2 Regulation 3 (1); (2) and (3) of the NEMA, 1998 (Act No. 107 of 1998).

THE PROPOSED BASIC ASSESSMENT FOR PAULPUTS WIND ENERGY FACILITY SOUTH (PTY) LTD SUBSTATION AND ASSOCIATED INFRASTRUCTURE

Paulputs Wind Energy Facility (RF) (Pty) Ltd ('PWEF'), a wholly owned subsidiary of WKN Windcurrent SA (Pty) Ltd, was granted environmental authorisation for the 300MW (75 turbines) Paulputs Wind Energy Facility (WEF) and its associated 132kV OHPL on 11 December 2019 by the Department Forestry,
