Dear Karen

RE: LONGYUAN MULILO DE AAR WIND ENERGY FACILITY AT MAANHAARBERG: ANIMAL SPECIES SEEN ON SITE

Dr David Hoare of **David Hoare Consulting cc** undertook a survey on site on 3 – 4 February 2014 to assess the location of the proposed infrastructure with respect to biodiversity patterns. The objective of the survey was to evaluate whether the infrastructure posed any risks in terms of the botanical receiving environment. During the vegetation survey, notes were made on any animal species observed on site. The attached table provides a list of all animal species seen on site.

Two Red List bird species were seen close to site (not on site), the Lesser Kestrel and the Kori Bustard, both listed as Vulnerable. In both cases a single individual was seen on the lowlands surrounding the site.

Yours faithfully,

David Hoare
Director / member

Common name	Scientific name	Conservation status
Kudu	<i>Tragelaphus strepsiceros</i>	LC
Duiker	<i>Sylvicapra grimmia</i>	LC
Rock hyrax	<i>Procavia capensis</i>	LC
Scrub hare	<i>Lepus saxatilis</i>	LC
Hewitt's red rock rabbit	<i>Pronolagus saundersiae</i>	LC
Common mole-rat	<i>Cryptomys hottentotus</i>	LC
Porcupine	<i>Hystrix africaeaustralis</i>	LC
Striped mouse	<i>Rhabdomys pumilio</i>	LC
Cape ground squirrel	<i>Xerus inauris</i>	LC
Aardvark	<i>Orycteropus afer</i>	LC
Rock monitor	<i>Varanus albigularis</i>	LC
Leopard tortoise	<i>Stigmochelys pardalis</i>	LC
Lesser kestrel	<i>Falco naumanni</i>	Vulnerable
Northern black korhaan	<i>Afrotis afroides</i>	LC, endemic
Kori bustard	<i>Ardeotis kori</i>	Vulnerable
