1. PURPOSE OF THIS DOCUMENT

The purpose of this **Background Information Document (BID)** is as follows:

1. It serves to provide an overview of the proposed development of the Altina 120MW Solar Photovoltaic (PV) Project near the town of Orkney in the Free State Province (the "Project");
2. It provides an outline of the environmental assessments that will be undertaken for the proposed Project; and
3. It grants the opportunity to be registered as an Interested and Affected Party (I&AP) and allows for upfront comments to be made on the proposed Project (refer to the attached Reply Form).

2. BACKGROUND & MOTIVATION

Electricity generation sources need to be diversified to ensure security of supply and reduction in the carbon footprint created by the current heavy reliance of South Africa (SA) on coal to produce electricity. The electricity demand is increasing in SA, and in order to match that demand there is a need to supply a diversified power generation that includes renewable energy technologies. These technologies include solar, wind, small utility scale hydro, biomass, biogas and energy storage that the Department of Mineral Resources and Energy (DMRE) intends to develop and implement as identified in the approved Integrated Resource Plan (IRP) 2019.

Genesis Eco-Energy Developments (Pty) Ltd (the Applicant) has proposed the development of the Altina 120MW Solar PV Project near the town of Orkney, in the Free State Province (refer to locality map in **Figure 1** below). The site falls within the Klerksdorp Renewable Energy Development Zone (REDZ), as published in Government Notice No. 142 of 26 February 2021. The electricity generated by the Project will be injected into the existing Eskom 132 kV distribution system.

The Applicant intends to bid for Renewable Energy Independent Power Producer Procurement Programme (REIPPPP) bid windows and /or other renewable energy markets within SA.

3. PV TECHNOLOGY

PV technology produces direct current (DC) which is then converted to alternating current (AC) via power electronic inverters. **Figure 2** below provides an overview of a typical Solar PV Power Plant project.

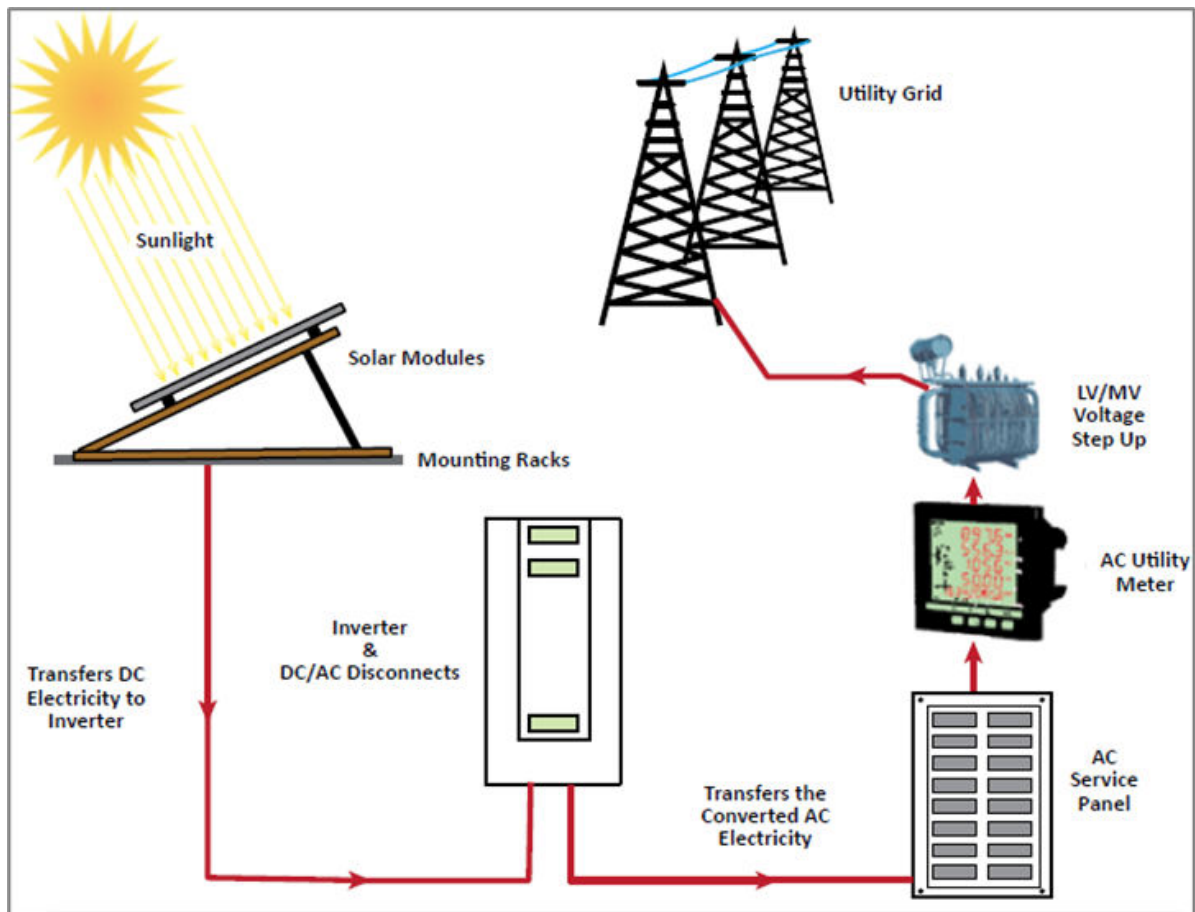

Figure 2: Overview of Solar PV Power Plant (International Finance Corporation, 2015. Utility-Scale Solar Photovoltaic Power Plants.)

4. PROJECT OVERVIEW

The Project is located in the northern part of the Free State Province and falls within the Fezile Dabi District Municipality and Moqhaka Local Municipality. The site is located approximately 7km to the south of the town of Orkney and is crossed by the R76.

The proposed Project footprint is as follows:

- ◆ Potential Solar Areas – 149Ha and 63Ha (total of 212Ha); and
- ◆ Grid connection – approximately 1km (substation located to the immediate east of the Project boundary).

The proposed Project consists of the following systems, sub-systems or components (amongst others):

- ◆ PV panel arrays, which are the subsystems which convert incoming sunlight into electrical energy;
- ◆ Mounting structures to support the PV panels;
- ◆ On-site inverters to convert DC to facilitate AC connection between the solar energy facility and electricity grid;
- ◆ New 132 kV power lines between the on-site substation(s) and the grid connection point;
- ◆ Cabling between the Project's components, to be laid underground (where practical);
- ◆ Administration Buildings (Offices);
- ◆ Workshop areas for maintenance and storage;
- ◆ Temporary laydown areas;
- ◆ Internal access roads and perimeter fencing of the footprint;
- ◆ High Voltage (HV) Transformers; and
- ◆ Security Infrastructure.

5. ENVIRONMENTAL ASSESSMENTS

5.1 ENVIRONMENTAL PROCESSES

Nemai Green was appointed as the Environmental Assessment Practitioner (EAP) to undertake the following environmental processes to seek authorisation for the proposed Project:

- Undertake a Basic Assessment Process in terms of the Environmental Impact Assessment (EIA) Regulations of 2014 (as amended), promulgated under the National Environmental Management Act (Act No. 107 of 1998) (NEMA). The mandated authority is the Department of Forestry, Fisheries and the Environment (DFFE). Refer to **Figure 3** below for an outline of the Basic Assessment Process; and
- Compile a Water Use Licence Application (WULA) in terms of the National Water Act (Act No. 36 of 1998) (NWA) for water uses associated with the Project. The mandated authority in terms of the NWA is the Department of Water and Sanitation (DWS). Refer to **Figure 4** below for an outline of the WULA Process.

Note that there are also other pieces of legislation and mandated authorities governing specific environmental management topics (e.g. waste, air quality, etc.) and features (e.g. biodiversity, heritage and cultural resources, etc.), which will be considered further as the environmental assessments unfold.

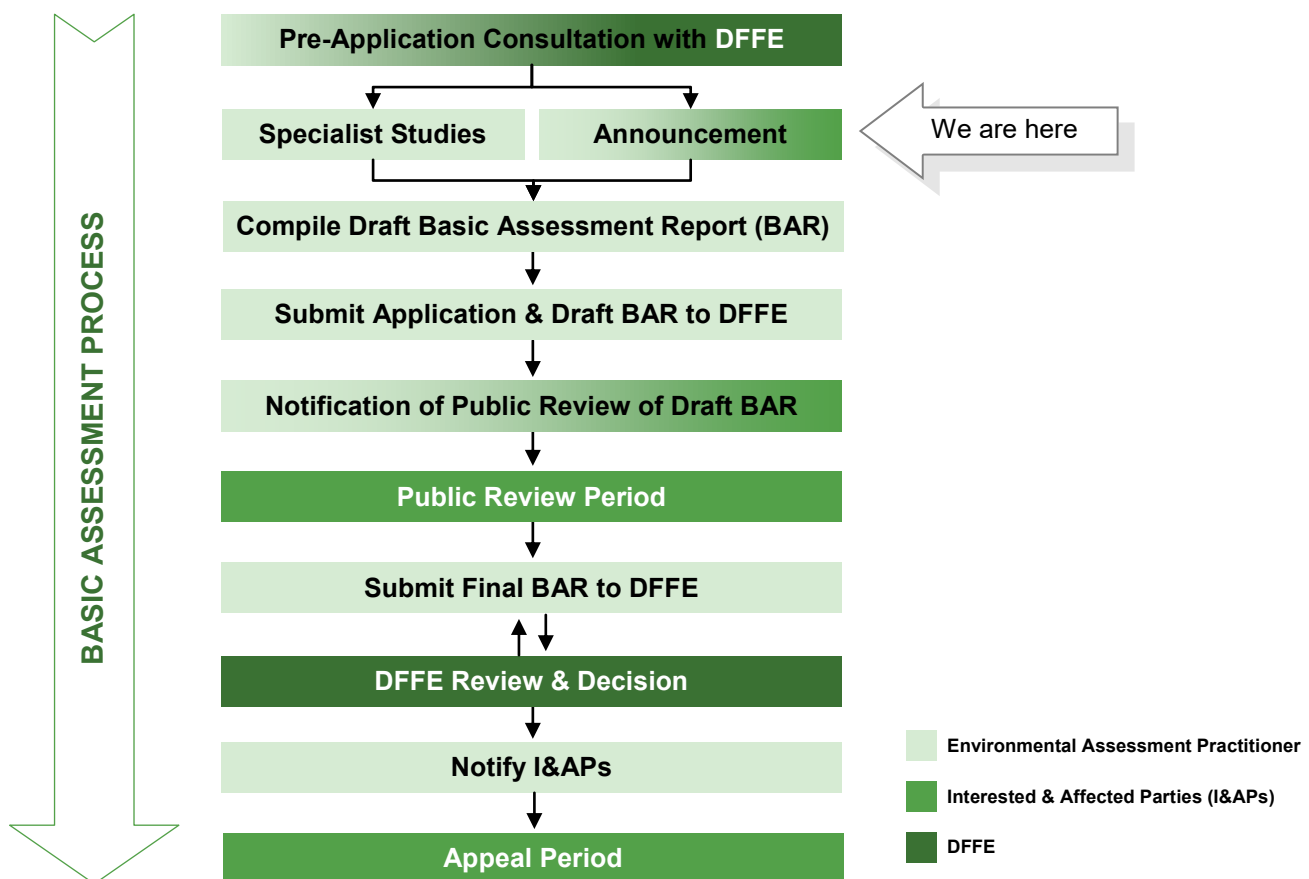

Figure 3: Outline of Basic Assessment Process

5.2 SPECIALIST STUDIES

Specialist input is ordinarily required to assess potentially significant impacts to particular features of the receiving environment. At this stage, the following environmental specialist studies are earmarked to be undertaken as part of the environmental processes:

- ◆ Aquatic Impact Assessment and Delineation;
- ◆ Terrestrial Ecological Impact Assessment;
- ◆ Avifaunal Impact Assessment;
- ◆ Phase 1 Heritage Impact Assessment;
- ◆ Agricultural Impact Assessment;
- ◆ Social Impact Assessment;
- ◆ Visual Impact Assessment; and
- ◆ Desktop Palaeontological Impact Assessment.

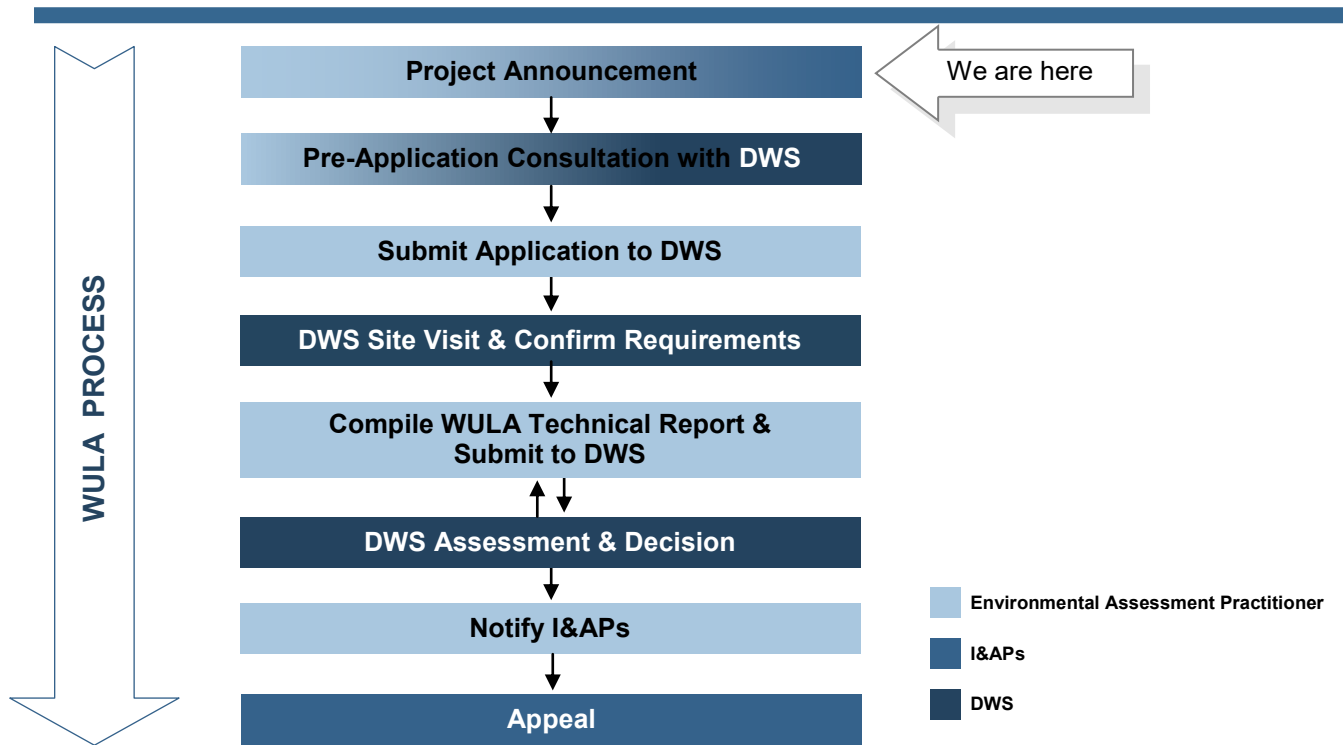

Figure 4: Outline of WULA Process

5.3 PUBLIC PARTICIPATION

5.3.1 Overview of Public Participation Process

Public Participation will be undertaken in accordance with Chapter 6 of the EIA Regulations of 2014 (as amended). Some of the key tasks that form part of the Public Participation Process include the following (amongst others):

- ◆ Compile and maintain a database of stakeholders;
- ◆ Announce the Project and allow for the registration of I&APs (*note: this is where we currently are in the process*);
- ◆ Grant authorities and registered I&APs a period of 30 days to review and submit comments on the draft BAR and WULA Technical Report; and
- ◆ Provide notification of DFFE's and DWS' decisions and explain the respective appeal processes.

All measures necessary to contain the spread of COVID -19 will need to be taken during Public Participation.

5.3.2 Registration as an I&AP

To register as an I&AP and to raise any comments or concerns regarding the proposed Project, please complete the **attached Reply Form** and return it to Nemaï Green by **5 May 2022**.

NOTICE OF ENVIRONMENTAL ASSESSMENTS

**PROPOSED ALTINA 120MW SOLAR PHOTOVOLTAIC (PV) PROJECT NEAR ORKNEY,
FREE STATE PROVINCE**

Notice is hereby given in terms of the following:

- The Environmental Impact Assessment (EIA) Regulations of 2014 (as amended), in terms of the National Environmental Management Act (Act No. 107 of 1998) (NEMA); and
- The National Water Act (Act No. 36 of 1998) (NWA).

PROJECT OVERVIEW:

Genesis Eco-Energy Developments (Pty) Ltd (the Applicant) has proposed the development of the Altina 120MW Solar PV Project near the town of Orkney, within the Moqhaka Local Municipality and Fezile Dabi District Municipality in the Free State Province. The associated infrastructure includes access roads, overhead power line, on-site substation and on-site buildings and structures (amongst others). The electricity generated by the proposed Project will be injected into the existing Eskom 132 kV distribution system. The Applicant intends to bid for Renewable Energy Independent Power Producer Procurement Programme (REIPPPP) bid windows and /or other renewable energy markets within South Africa.

The site is located within the Klerksdorp Renewable Energy Development Zone (REDZ), as published in Government Notice No. 142 of 26 February 2021.

The proposed Project Area includes the following properties:

- Portion 0 of the Farm Rietvlei 539;
- Portion 0 of the Farm Batsfontein 290; and
- Portion 0 of the Farm Altona 50.

ENVIRONMENTAL ASSESSMENTS:

Nemaï Green was appointed by the Applicant as the Environmental Assessment Practitioner (EAP) to undertake the following environmental processes for the proposed Project:

1. A Basic Assessment process in terms of the EIA Regulations of 2014 (as amended) to seek Environmental Authorisation for the Project in terms of the NEMA, where the mandated authority is the Department of Forestry, Fisheries and the Environment (DFFE); and
2. A Water Use Licence Application (WULA) in terms of the NWA for water uses associated with the Project, where the mandated authority is the Department of Water and Sanitation (DWS).

REGISTRATION AS AN INTERESTED AND AFFECTED PARTY:

In order to ensure that you are registered as an Interested and Affected Party, please submit your name, contact information and interest in the proposed Project to the contact person below by 5 May 2022.

KENNISGEWING VAN OMGEWINGSBEPALINGS

**VOORGESTELDE ALTINA 120MW FOTOVOLTAÏESE (FV) SONKRAAG PROJEK NABY
ORKNEY, VRYSTAAT PROVINSIE**

Hierdie kennisgewing word gegee kragtens die volgende:

- Die Omgewingsimpakbepalingsregulasies van 2014 (soos gewysig), kragtens die Wet op Nasionale Omgewingsbestuur (Wet Nr. 107 van 1998) (hierna *NEMA*); en
- Die Nasionale Waterwet (Wet Nr. 36 van 1998) (hierna *NWA*).

PROJEKOORSIG:

Genesis Eco-Energy Developments (Edms) Bpk (die Aansoeker) stel voor om die Altina 120MW Fotovoltaïese (FV) Sonkraag Aanleg naby Orkney, in die Moqhaka Plaaslike Munisipaliteit en Fezile Dabi-distriksmunisipaliteit, in die Vrystaat Provinsie op te rig. Verwante infrastruktuur sluit toegangspaaie, oorhoofse kraglyn, terrein substasie, interne geboue en strukture, ens. in. Krag wat deur die voorgestelde Projek opgewek gaan word sal aan Eskom se bestaande 132kV distribusiestelsel toegevoer word. Die Aansoeker beplan om aan die bodprosesse vir die verkrygingsprogram vir onafhanklike kragvoorsieners in hernubare energie (*REIPPPP*) deel te neem, sowel as om ander hernubare energie-markte in Suid Afrika in ag te neem.

Die terrein is geleë in die Klerksdorp ontwikkelingsone vir hernubare energie (*REDZ*), ingevolge Goewermentskennisgewing Nr. 142 van 26 February 2021.

Die voorgestelde projek-terrein sluit die volgende eiendomme in:

- Gedeelte 0 van die Plaas Rietvlei 539;
- Gedeelte 0 van die Plaas Batsfontein 290; en
- Gedeelte 0 van die Plaas Altona 50.

OMGEWINGSBEPALINGS:

Nemaï Green is deur die Aansoeker as die omgewingsbepalingspraktisyn aangestel om die volgende omgewingsbepalings vir die voorgestelde projek uit te voer:

1. Basiese Bepalingsproses ingevolge die Omgewingsimpakbepalingsregulasies van 2014 (soos gewysig) om vir Omgewingsmagtiging aansoek to doen, kragtens NEMA. Die Departement van Bosbou, Visserye en die Omgewing (*DFFE*) is die bevoegde owerheid met betrekking tot die aansoek; en
2. Lisensie-aansoek vir watergebruik (*WULA*) ingevolge die NWA. Die Departement van Water en Sanitasie (*DWS*) is die bevoegde owerheid met betrekking tot die *WULA*.

REGISTRASIE AS BELANGHEBBENDE EN GEAFFEKTEERDE PARTY

Ten einde te verseker dat u geregistreer word as 'n Belanghebbende en Geaffekteerde Party, stuur asseblief u naam, kontakbesonderhede en belange in die projek aan die onderstaande kontakpersoon teen 5 Mei 2022.

KONTAKBESONDERHEDE VAN OMGEWINGBEPALINGS PRAKTISYN:
