**Agricultural Compliance Statement
for the Grid Connection for the Paulputs South Wind Energy Facility,
Northern Cape**

Paulputs WEF (RF) (Pty) Ltd, received environmental authorisation for the Paulputs Wind Energy Facility (WEF) on 11 December 2019, DEA Reference No. 14/12/16/3/3/2/1160. This included authorisation for one on-site substation and overhead power line. The environmental assessment process included the assessment of other grid connection options and substation location options.

A separate amendment application is being made to split the authorised WEF, which was located both north and south of the N14, into two separate WEFs, one located north of the N14, and the other south.

The Applicant - Paulputs Wind Energy Facility South (RF) (Pty) Ltd - therefore requires environmental authorisation for its own on-site substation and overhead power line, which will be located at one of the options already assessed in the environmental impact assessment that received environmental authorisation.

There are no agricultural impacts related to this grid connection component that have not already been identified and assessed in the original agricultural impact assessment for the authorised WEF. All impacts identified in this were of low impact. The authorisation for the Paulputs South WEF grid connection does not require any changes or additions to the mitigation measures for agricultural impacts that were recommended for the authorised WEF, and there are therefore no required changes to the EMPr.

Agricultural Compliance Statement

The grid connection site is identified on the national web-based environmental screening tool as being predominantly of low, but including some medium sensitivity land for agricultural resources. This is shown in Figure 1. The identified sensitivity is confirmed by this assessment.

Because of the low sensitivity of the site and the negligible agricultural impact of grid

infrastructure in this agricultural environment, the proposed grid connection does not have an unacceptable negative impact on the agricultural production capability of the site. For the same reasons, micro-siting will have no influence on agricultural impacts in this environment and it is therefore confirmed that all reasonable measures have been taken through micro-siting to avoid or minimise fragmentation and disturbance of agricultural activities. From an agricultural impact point of view, it is recommended that the development be approved.

Figure 1. Map of the proposed development footprint overlaid on the agricultural sensitivity, as identified by the screening tool (green = low sensitivity; yellow = medium sensitivity).

This statement is not subject to any conditions. In completing this statement, no assumptions have been made and there are no uncertainties or gaps in knowledge or data that are relevant to it.

**Site sensitivity verification
for the Paulputs Wind Energy Facilities
and electrical grid connections**

The Protocol for the specialist assessment and minimum report content requirements of environmental impacts on agricultural resources, gazetted on 20 March 2020, states that:

prior to commencing with a specialist assessment, the current use of the land and the environmental sensitivity of the site under consideration, identified by the screening tool, must be confirmed by undertaking a site sensitivity verification that confirms or disputes the current use of the land and the environmental sensitivity as identified by the screening tool.

In terms of the gazetted agricultural protocol, a site sensitivity verification must be submitted that:

- 1. confirms or disputes the current use of the land and the environmental sensitivity as identified by the screening tool, such as new developments or infrastructure, the change in vegetation cover or status etc;*
- 2. contains a motivation and evidence (e.g. photographs) of either the verified or different use of the land and environmental sensitivity.*

Agricultural sensitivity, in terms of environmental impact, and as used in the national web-based environmental screening tool, is a direct function of the capability of the land for agricultural production. The screening tool classifies agricultural sensitivity according to two criteria - the cultivation status and the land capability.

The proposed site is identified on the national web based environmental screening tool as being of predominantly low sensitivity for agricultural resources, with some areas of medium. This is because the site's land capability evaluation values classify it predominantly within the low sensitivity class (values of 1 to 5), with some areas within the medium sensitivity class (values of 6 to 8). A map of the proposed site overlaid on the screening tool sensitivity is given in Figure 1.

The agricultural sensitivity, as identified by the screening tool, is confirmed by this assessment. The motivation and evidence for confirming the sensitivity is that the low land capability of the area is predominantly a function of the arid climate. The aridity of the climate is entirely beyond dispute, and there is no particular evidence needed to show this. The differences between medium and low sensitivity on this site are largely insignificant and are more a result of the way the land capability data is generated per pixel, than any practical, on the ground differences in agricultural potential.

Figure 1. The proposed site (black outline) overlaid on agricultural sensitivity as identified by the screening tool (green = low; yellow = medium).

A handwritten signature in black ink, appearing to read 'J. Lanz'.

Application for authorisation in terms of the National Environmental Management Act, Act No. 107 of 1998, as amended and the Environmental Impact Assessment (EIA) Regulations, 2014, as amended (the Regulations)

PROJECT TITLE

Proposed Amendment of the Paulputs Wind Energy Facility, Northern Cape Province

Kindly note the following:

1. This form must always be used for applications that must be subjected to Basic Assessment or Scoping & Environmental Impact Reporting where this Department is the Competent Authority.
2. This form is current as of 01 September 2018. It is the responsibility of the Applicant / Environmental Assessment Practitioner (EAP) to ascertain whether subsequent versions of the form have been published or produced by the Competent Authority. The latest available Departmental templates are available at <https://www.environment.gov.za/documents/forms>.
3. A copy of this form containing original signatures must be appended to all Draft and Final Reports submitted to the department for consideration.
4. All documentation delivered to the physical address contained in this form must be delivered during the official Departmental Officer Hours which is visible on the Departmental gate.
5. All EIA related documents (includes application forms, reports or any EIA related submissions) that are faxed; emailed; delivered to Security or placed in the Departmental Tender Box will not be accepted, only hardcopy submissions are accepted.

2. DECLARATION BY THE SPECIALIST

I, **Johann Lanz**, declare that -

- I act as the independent specialist in this application;
- I will perform the work relating to the application in an objective manner, even if this results in views and findings that are not favourable to the applicant;
- I declare that there are no circumstances that may compromise my objectivity in performing such work;
- I have expertise in conducting the specialist report relevant to this application, including knowledge of the Act, Regulations and any guidelines that have relevance to the proposed activity;
- I will comply with the Act, Regulations and all other applicable legislation;
- I have no, and will not engage in, conflicting interests in the undertaking of the activity;
- I undertake to disclose to the applicant and the competent authority all material information in my possession that reasonably has or may have the potential of influencing - any decision to be taken with respect to the application by the competent authority; and - the objectivity of any report, plan or document to be prepared by myself for submission to the competent authority;
- all the particulars furnished by me in this form are true and correct; and
- I realise that a false declaration is an offence in terms of regulation 48 and is punishable in terms of section 24F of the Act.
