

# Gauteng Department of Agriculture and Rural Development (GDARD)

Basic Assessment Report in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998), as amended, and the Environmental Impact Assessment Regulations, 2010 (Version 1)

List of all organs of state and State Departments where the draft report has been submitted, their full contact details and contact person

#### Kindly note that:

- 1. This **Basic Assessment Report** is the standard report required by GDARD in terms of the EIA Regulations, 2010.
- 2. This application form is current as of 2 August 2010. It is the responsibility of the EAP to ascertain whether subsequent versions of the form have been published or produced by the competent authority.
- 3. A draft Basic Assessment Report must be submitted to all State Departments administering a law relating to a matter likely to be affected by the activity to be undertaken. The draft reports must be submitted to the relevant State Departments and on the same day, two CD's of draft reports must also be submitted to the Competent Authority (GDARD) with a signed proof of such submission of draft report to the relevant State Departments.
- 4. The report must be typed within the spaces provided in the form. The size of the spaces provided is not necessarily indicative of the amount of information to be provided. The report is in the form of a table that can extend itself as each space is filled with typing.
- 5. Selected boxes must be indicated by a cross and, when the form is completed electronically, must also be highlighted.
- 6. An incomplete report shall be rejected.
- 7. The use of "not applicable" in the report must be done with circumspection because if it is used in respect of material information that is required by the competent authority for assessing the application, it may result in the rejection of the application as provided for in the regulations.
- 8. Five (5) copies (3 hard copies and 2 CDs-PDF) of the final report and attachments must be handed in at offices of the relevant competent authority, as detailed below.
- 9. No faxed or e-mailed reports will be accepted. Only hand delivered or posted applications will be accepted.
- 10. Unless protected by law, and clearly indicated as such, all information filled in on this application will become public information on receipt by the competent authority. The applicant/EAP must provide any interested and affected party with the information contained in this application on request, during any stage of the application process.

3. ALTERNATIVES

Describe the proposal and alternatives that are considered in this application. Alternatives should include a consideration of all possible means by which the purpose and need of the proposed activity could be accomplished. The determination of whether the site or activity (including different processes etc.) or both is appropriate needs to be informed by the specific circumstances of the activity and its environment.

The no-go option must in all cases be included in the assessment phase as the baseline against which the impacts of the other alternatives are assessed. **Do not** include the no go option into the alternative table below.

**Note:** After receipt of this report the competent authority may also request the applicant to assess additional alternatives that could possibly accomplish the purpose and need of the proposed activity if it is clear that realistic alternatives have not been considered to a reasonable extent. Provide a description of the alternatives considered

No.	Alternative type, either	Description
	alternative: site on property,	
	properties, activity, design, technology, operational or	
	other(provide details of "other")	
Alternative	Proposal:	It is proposed that the Remainder of Portion 26 of
1	Establishment of 3	the farm Derdepoort 327-JR be developed for the
	'Residential 1' stands	following uses:
	on <u>conventional</u> foundations and an Erf	Proposed Erf 1, 2 and 3: a) Zoning - "Residential 1"
	zoned Special for	b) Coverage - 500m <sup>2</sup> footprint
	services	c) FAR - 0.3
		d) Height - 2 storeys
		Proposed Erf 4:
		a) Zoning - Special for services
		b) Coverage - N/A
		c) Parking - N/A d) Height - N/A
		e) SDP - N/A
		Refer Appendix A for proposed Layout Plan.
		Water:
		The Township links to a constructed street called
		Reid's Place within the township of Montana
		Park. There is an existing 110mmØ municipal
		water line in Reid's Place and has sufficient
		capacity for the needs of the Township. Each stand will be supplied with a dedicated water
		connection at Reid's Place from where the
		respective water lines will have to be extended as
		private services up to each stand. The Annual
		Average Daily Demand (AADD) is calculated as
		follows:
		The AADD for three (3) Residential 1 erven with sizes between 1,001m <sup>2</sup> and 1,500m <sup>2</sup> at a water
		demand of 2,0 kl/stand/day = $6,0$ kl/day. The
		existing fire hydrant in Reid's Place is placed
		such that no dwelling in the Township is further
		than 90m from this hydrant.
		Sewer:
		There is an existing sewer line in Reid's Place. A
		sewer extension will have to be constructed from
		the existing sewer line up to each of the
		Township's stands to provide for a sewer connection on each stand. The Developer will be
		responsible for the installation and cost of the
		sewer line and for the registration of the
		associated servitudes. The total Peak Daily Dry
		Weather Flow (PDDWF) is calculated as follows:

		The PDDWF for three (3) Residential 1 erven with
		sizes between 1,001m <sup>2</sup> and 1,500m <sup>2</sup> at a sewer outflow of 0,8 kl/stand/day = 2,4 kl/day.
		<b>Stormwater:</b> The closest formal stormwater system to which the internal stormwater system of the Township can be connected is situated in the turning circle of Reid's Place. The Developer will be responsible for the installation and cost of a connecting stormwater line that will link the internal stormwater lines with the external municipal system.
		<b>Roads:</b> The property is currently accessed from Reid's Place via a registered Right of Way Servitude over Erf 503 Montana Park. The future Township's access will also be along this Servitude. The Developer will be responsible for the construction of an internal Right of Way Access Road to reach each stand with a dust free road surface.
		Waste Removal: No disposal of construction waste generated during the development phase will take place within the boundaries of the Proposed Township. All such waste will be regularly collected and transported and disposed of at one of the City of Tshwane's (CoT's) licensed landfill site. All vehicles used will be as such that no spillage of waste could take place along any route travelled to dispose of the waste. Once developed the domestic waste will be collected at each individual property and disposed of by the CoT's formal waste removal system. <i>Refer Appendix G1 for Services Report.</i>
		<b>Electricity:</b> Burotech Consulting Electrical Engineers was appointed to conduct a study on the availability of electricity for the development. An application was made to the City of Tshwane and confirmation regarding availability of electricity to the township was received. <i>Refer Appendix G2.</i>
Alternative 2	Establishment of 3 Residential 1 stands <u>on</u> <u>stilts or similar</u> and an Erf zoned Special for services	It is proposed that the Remainder of Portion 26 of the farm Derdepoort 327-JR be developed for the following uses: <b>Proposed Erf 1, 2 and 3:</b> a) Zoning - "Residential 1" b) Coverage 500m <sup>2</sup> footprint
	<ul> <li>Benefits of houses built on stilts/ similar:</li> <li>Less land required for building of foundation</li> <li>Space underneath</li> </ul>	<ul> <li>b) Coverage - 500m<sup>2</sup> footprint</li> <li>c) FAR - 0.3</li> <li>d) Height - 2 storey's</li> <li>The houses are proposed to be built on stilts in order to reduce the use of machinery required during construction phase as well as to limit impacts on the environment.</li> </ul>
	houses can be used for e.g. parking	Proposed Erf 4: a) Zoning - Special for services

Less material	b) Coverage - N/A

purposes compared to conventional	e) SDP - N/A
foundations	Water:
Aids in keeping	The Township links to a constructed street called
vermin out	Reid's Place within the township of Montana
	Park. There is an existing 110mmØ municipal
	water line in Reid's Place and has sufficient capacity for the needs of the Township. Each
	stand will be supplied with a dedicated water
	connection at Reid's Place from where the
	respective water lines will have to be extended as
	private services up to each stand. The Annual
	Average Daily Demand (AADD) is calculated as follows:
	The AADD for three (3) Residential 1 erven with
	sizes between 1,001m <sup>2</sup> and 1,500m <sup>2</sup> at a water
	demand of 2,0 kl/stand/day = 6,0 kl/day. The
	existing fire hydrant in Reid's Place is placed such that no dwelling in the Township is further
	than 90m from this hydrant.
	Sewer:
	There is an existing sewer line in Reid's Place. A sewer extension will have to be constructed from
	the existing sewer line up to each of the
	Township's stands to provide for a sewer
	connection on each stand. The Developer will be
	responsible for the installation and cost of the
	sewer line and for the registration of the associated servitudes. The total Peak Daily Dry
	Weather Flow (PDDWF) is calculated as follows:
	The PDDWF for three (3) Residential 1 erven with
	sizes between $1,001m^2$ and $1,500m^2$ at a sewer
	outflow of 0,8 kl/stand/day = 2,4 kl/day.
	Stormwater:
	The closest formal stormwater system to which
	the internal stormwater system of the Township can be connected is situated in the turning circle
	of Reid's Place. The Developer will be
	responsible for the installation and cost of a
	connecting stormwater line that will link the
	internal stormwater lines with the external municipal system.
	Roads:
	The property is currently accessed from Reid's Place via a registered Right of Way Servitude
	over Erf 503 Montana Park. The future
	Township's access will also be along this
	Servitude. The Developer will be responsible for
	the construction of an internal Right of Way Access Road to reach each stand with a dust free
	road surface.
	Waste Removal:
	No disposal of construction waste generated during the development phase will take place
	within the boundaries of the Proposed Township.

All such waste will be regularly collected and transported and disposed of at one of the CoT's licensed landfill site. All vehicles used will be as such that no spillage of waste could take place along any route travelled to dispose of the waste. Once developed the domestic waste will be collected at each individual property and disposed of by the CoT's formal waste removal system. <i>Refer Appendix G1 for Services Report.</i>
<b>Electricity:</b> Burotech Consulting Electrical Engineers was appointed to conduct a study on the availability of electricity for the development. An application was made to the City of Tshwane and confirmation regarding availability of electricity to the township was received. <i>Refer Appendix G2.</i>

In the event that no alternative(s) has/have been provided, a motivation must be included in the table below.

#### NOTE: The numbering in the above table must be consistently applied throughout the application report and process

#### 4. PHYSICAL SIZE OF THE ACTIVITY

Indicate the total physical size (footprint) of the proposal as well as alternatives. Footprints are to include all new infrastructure (roads, services etc), impermeable surfaces and landscaped areas: \_ \_ \_ . .. ....

	Size of the activity:
Proposed activity	4217m <sup>2</sup>
Alternatives:	
Proposal: Alternative 1	4217m <sup>2</sup>
Alternative 2	4217m <sup>2</sup>
	Ha/ m <sup>2</sup>
or, for linear activities:	Length of the activity:
Proposed activity	Length of the detivity.
Alternatives:	
Alternative 1 (if any)	
Alternative 2 (if any)	
	k/km

Indicate the size of the site(s) or servitudes (within which the above footprints will occur):

	Size of the site/servitude:
Proposed activity	
Alternatives:	
Alternative 1 (if any)	
Alternative 2 (if any)	
	Ha/m2

#### 5. SITE ACCESS

#### **Proposal (Alternative 1)**

Does ready access to the site exist, or is access directly from an existing road? The property is currently accessed from Reid's Place via a registered Right of Way Servitude over Erf 503 Montana Park. The future Township's access will also be along this Servitude. The Developer will be responsible for the construction of an internal Right of Way Access Road to reach each stand with a dust free road surface.

If NO, what is the distance over which a new access road will be built Describe the type of access road planned:

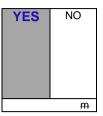

Include the position of the access road on the site plan.	

Include the position of the access road on the site plan.

#### Alternative 2

Does ready access to the site exist, or is access directly from an existing road? The property is currently accessed from Reid's Place via a registered Right of Way Servitude over Erf 503 Montana Park. The future Township's access will also be along this Servitude. The Developer will be responsible for the construction of an internal Right of Way Access Road to reach each stand with a dust free road surface. If NO, what is the distance over which a new access road will be built Describe the type of access road planned:

Include the position of the access road on the site plan.

# PLEASE NOTE: Points 6 to 8 of Section A must be duplicated where relevant for alternatives

Section A 6-8 has been duplicated (only complete when applicable)

Number of times

#### 6. SITE OR ROUTE PLAN

A detailed site or route (for linear activities) plan(s) must be prepared for each alternative site or alternative activity. It must be attached as Appendix A to this document. The site or route plans must indicate the following:

- the scale of the plan, which must be at least a scale of 1:2000 (scale can not be larger than 1:2000 i.e. scale can not be 1:2500 but could where applicable be 1:1500)
- > the property boundaries and numbers of all the properties within 50m of the site;
- > the current land use as well as the land use zoning of each of the properties adjoining the site or sites;
- > the exact position of each element of the application as well as any other structures on the site;

0

- the position of services, including electricity supply cables (indicate above or underground), water supply pipelines, boreholes, street lights, sewage pipelines, septic tanks, storm water infrastructure and telecommunication infrastructure;
- walls and fencing including details of the height and construction material;
- servitudes indicating the purpose of the servitude;
- > sensitive environmental elements on and within 100m of the site or sites including (but not limited thereto):
  - Rivers and wetlands;
  - the 1:100 and 1:50 year flood line;
  - ridges;
  - cultural and historical features;
  - areas with indigenous vegetation (even if it is degraded or infested with alien species);
- for gentle slopes the 1m contour intervals must be indicated on the plan and whenever the slope of the site exceeds 1:10, the 500mm contours must be indicated on the plan; and
- > the positions from where photographs of the site were taken.
- Where a watercourse is located on the site at least one cross section of the water course must be included (to allow the 32m position from the bank to be clearly indicated)

#### 7. SITE PHOTOGRAPHS

Colour photographs from the center of the site must be taken in at least the eight major compass directions with a description of each photograph. Photographs must be attached under the appropriate Appendix. It should be supplemented with additional photographs of relevant features on the site, where applicable. *Refer Appendix B* 

#### 8. FACILITY ILLUSTRATION

A detailed illustration of the activity must be provided at a scale of 1:200 for activities that include structures. The illustrations must be to scale and must represent a realistic image of the planned activity. The illustration must give a representative view of the activity. To be attached in the appropriate Appendix.

Note: Facility Illustrations have not been provided as the project is not at detail design stage as yet. *A Preliminary Site Layout Plan is attached as Appendix A.* 

### SECTION B: DESCRIPTION OF RECEIVING **ENVIRONMENT**

Note: Complete Section B for the proposal and alternative(s) (if necessary)

#### Further:

#### Instructions for completion of Section B for linear activities

- For linear activities (pipelines etc) it may be necessary to complete Section B for each section of the site 1) that has a significantly different environment.
- Indicate on a plan(s) the different environments identified
- Complete Section B for each of the above areas identified
- Attach to this form in a chronological order 4
- Each copy of Section B must clearly indicate the corresponding sections of the route at the top of the next 5) page.

"insert No. of duplicates" times Section B has been duplicated for sections of the route

Instructions for completion of Section B for location/route alternatives

- For each location/route alternative identified the entire Section B needs to be completed
- Each alterative location/route needs to be clearly indicated at the top of the next page 2)
- Attach the above documents in a chronological order 3)

Section B has been duplicated for location/route alternatives 0 times (complete only when appropriate)

Note: As both alternatives are located on the same site this section of the report as not been duplicated.

#### Instructions for completion of Section B when both location/route alternatives and linear activities are applicable for the application

Section B is to be completed and attachments order in the following way

- All significantly different environments identified for Alternative 1 is to be completed and attached in a chronological order: then
- All significantly different environments identified for Alternative 2 is to be completed and attached chronological order. etc.

Section B - Section of Route

Section B - Location/route Alternative No.

(complete only when appropriate for above)

(complete only when appropriate for above)

#### 1. PROPERTY DESCRIPTION

Property description:

(Farm name, portion etc.)

Remainder of Portion 26 of the farm Derdepoort 327 JR

#### 2. **ACTIVITY POSITION**

Indicate the position of the activity using the latitude and longitude of the centre point of the site for each alternative site. The co-ordinates should be in decimal degrees. The degrees should have at least six decimals to ensure adequate accuracy. The projection that must be used in all cases is the WGS84 spheroid in a national or local projection.

Alternative:	Latitude (S):	Longitude (E):
Proposal	25.691289°	28.254442°

In the case of linear activities: Alternative:

Latitude (	(0).	
Latitude	5	

Longitude (E):

<ul> <li>Starting point of the activity N/A</li> </ul>	θ	θ
<ul> <li>Middle point of the activity N/A</li> </ul>	θ	θ
<ul> <li>End point of the activity N/A</li> </ul>	θ	θ

For route alternatives that are longer than 500m, please provide co-ordinates taken every 250 meters along the route and attached in the appropriate Appendix

Addendum of route alternatives attached

N/A
-----

YES

----

NO

#### 3. GRADIENT OF THE SITE

Indicate the general gradient of the site.

		Flat	1:50 – 1:20	1:20 – 1:15	1:15 – 1:10	1:10 – 1:7,5	1:7,5 – 1:5	Steeper than 1:5
--	--	------	-------------	-------------	-------------	--------------	-------------	------------------

#### 4. LOCATION IN LANDSCAPE

Indicate the landform(s) that best describes the site.

Ridgeline	Plateau	Side slope of hill/ridge	Valley	Plain	Undulating plain/low hills	River front
-----------	---------	-----------------------------	--------	-------	----------------------------	----------------

#### 5. GROUNDWATER, SOIL AND GEOLOGICAL STABILITY OF THE SITE

a) Is the site located on any of the following?

Shallow water table (less than 1.5m deep)

Dolomite, sinkhole or doline areas

Seasonally wet soils (often close to water bodies)

Soils with high clay content (clay fraction more than 40%)

Unstable rocky slopes or steep slopes with loose soil No hard rock excavation is expected in the upper 2,0m, except on the southern and western portions of Erf 1. The upper 2,0m material consists mainly of pebbles and boulders up to 300mm diameter with sand matrix. The sidewalls of excavations will become unstable when the pebbles and boulders become disturbed during the excavation process. The non-cohesive structure of the material will also play a role. Side-walls may have to be trimmed back to ensure safe working conditions, or temporary support may be necessary. Excavations on the southern portions of Erf 1 and Erf 2 will cut into the toe of the platform that was created for the construction of the main house on the remainder of portion 26. Such excavations may result in major instability of the side-slopes at the toe of this platform, as we suspect that it represents material that has not been placed under controlled conditions, but rather been pushed over the edge, only to come to rest at its natural angle of Natural consolidation has taken place since it has repose. been placed, but we regard the material as being 'unconsolidated'. Dispersive soils (soils that dissolve in water)

YES	NO	
YES	NO	

Any other unstable soil or geological feature Excavations on the southern portions of Erf 1 and Erf 2 will cut into the toe of the platform that was created for the construction of the main house on the remainder of portion 26. Such excavations may result in major instability of the side-slopes at the toe of this platform, as we suspect that it represents material that has not been placed under controlled conditions, but rather been pushed over the edge, only to come to rest at its natural angle of repose. Natural consolidation has taken place since it has been placed, but we regard the material as being 'unconsolidated'. An area sensitive to erosion Southern portions of the proposed Erf 1,2 and 3

YES	NO
YES	NO

#### Refer Appendix G3 for Geotechnical Assessment by AMB Engineering Geologist

(Information in respect of the above will often be available at the planning sections of local authorities. Where it exists, the 1:50 000 scale Regional Geotechnical Maps prepared by Geological Survey may also be used).

b) are any caves located on the site(s)	YES	NO	
If yes to above provide location details in Latitude (S):	terms of latitude and longitude and indicate location or Longitude (E):	ו site or rou	ite map(s)
θ			θ
c) are any caves located within a 300m ra	dius of the site(s)	YES	NO
If yes to above provide location details in L <mark>atitude (S):</mark>	terms of latitude and longitude and indicate location or Longitude (E):	) site or rou	ite map(s)
θ			θ
d) are any sinkholes located within a 300r	n radius of the site(s)	YES	NO
If yes to above provide location details in L <b>atitude (S):</b>	terms of latitude and longitude and indicate location or Longitude (E):	<del>) site or rou</del>	i <del>te map(s)</del>
θ			θ

If any of the answers to the above are "YES" or "unsure", specialist input may be requested by the Department

#### 6. AGRICULTURE

Does the site have high potential agriculture as contemplated in the Gauteng Agricultural Potential Atlas (GAPA 3)? According to the Gauteng Conservation Plan the site is characterised by a very low agricultural potential.

Please note: The Department may request specialist input/studies in respect of the above.

#### 7. GROUNDCOVER

To be noted that the location of all identified rare or endangered species or other elements should be accurately indicated on the site plan(s).

Indicate the types of groundcover present on the site and include the estimated percentage found on site

Natural veld - good	Natural veld with	Natural veld with	Veld dominated by	Landscaped
condition	scattered aliens	heavy alien infestation	alien species	(vegetation)
% = 5	%=30	% =	% =	% =60
Sport field % =	Cultivated land % =	Paved surface (hard landscaping) % =5	Building or other structure % =	Bare soil % =

Please note: The Department may request specialist input/studies depending on the nature of the groundcover and potential impact(s) of the proposed activity/ies.

Are there any rare or endangered flora or fauna species (including red list species) present on the site

NO

If YES, specify and explain:

#### 9. SOCIO-ECONOMIC CONTEXT

Describe the existing social and economic characteristics of the area and the community condition as baseline information to assess the potential social, economic and community impacts.

The property is situated south of the Kolonnade Retail Centre along Reid's Place with different commercial land uses surrounding it. The properties situated directly north, east and west is of residential nature. The area south of the property is known as the Magaliesberg Mountain Range. All the other surrounding properties are either vacant or used for residential purposes at present. The need for the township application is due to the fact that the property is situated next to the Magalies Mountain Range and the owner has an existing house on the property. However the house is not suitable to accommodate all three of her children and the owner would like to accommodate her children on the same property. It is a well known fact that areas next to the mountain are a high risk for break inns and it is a security risk. The owner would like to have her children housed on the same property of a security point of view. Due to the fact that the property is located within the green belt of the Magaliesberg Protected Natural Environment (MPNE), negotiations were undertaken with the GDARD prior to commencement with the formal EIA process. The site was further visited by the GDARD, and the feedback and way forward was for the client to submit an application to the GDARD for further consideration. (Please refer to Appendix 12 for copy of feedback from GDARD). As part of the required Public Consultation Process, the CoT Open Space Management Department were afforded an opportunity to register in the environmental process and provide their comment on the application. The City of Tshwane Open Space Management, represented by Mr Johannes Prinsloo contacted ILA and requested a meeting. During such meeting the CoT confirmed that the application site is situated within the proclaimed protected area the Magaliesberg Protected Natural Environment [MPNE]. The CoT indicated that no development was allowed within a proclaimed protected area. It was however confirmed that the portion south of the existing dwelling was disturbed due to human activity and some of these areas south of the existing dwelling had been excluded as sensitive areas in the latest Tshwane Bioregional Plan. Due to the fact that the application portion and the existing dwelling can be considered as part of the urban environment associated with the existing developments further south, the CoT proposed that the property owner consider an offset proposal. Such a proposal would entail that the CoT would consider supporting the development of the 3 residential erven upon condition that the remainder of the property which has not been disturbed by human activity become the property of the CoT and be zoned as Public Open Space. This would contribute to the CoT's objective to protect, manage and conserve the MPNE. With such an offset the MPNE line which currently includes the existing dwelling will be re-proclaimed to exclude the portion of the property where the existing dwelling is situated up to its southern boundary. A meeting was held on 10 January attended by Mr Chris du Plooy, Miss Claudia Coetzee of ILA, Mr Johannes Prinsloo and Mr Alexander Heunis of the Tshwane Nature Conservation Department. The above matters were discussed with Mr du Plooy. Mr Prinsloo indicated that the size of the portion to be transferred to CoT as per the offset proposal should be determined (Property size to be offset - 2.237ha - Refer Appendix 13. The offset portion should exclude the erf extending southward of the existing fence erected around the dwelling. Mr Prinsloo also indicated that an ecological scan should be conducted (Refer Appendix G5 for findings of Ecological Scan by EcoAgent CC) on the northern open space portion of the property in order to determine the value of the site in terms of its ecological sensitivity as this would provide further motivation for the offset proposal and re-proclamation of the MPNE line, as well as motivation for the development of the 3 residential stands [Environmental costs vs environmental benefits gained]. The CoT undertook to discuss the application with the deciding Provincial Authority GDARD on 23rd January 2013 at a forum meeting and confirmed they would motivate the merit in the offset proposal to the GDARD however, support from the CoT does not guarantee approval of the application by GDARD. It should however be noted that the area proposed to be developed is already transformed and the natural indigenous herbaceous vegetation is destroyed. The applicant is willing to proceed with the offset proposal and in the long term this will strengthen the objective that the CoT has to protect, manage and conserve the MPNE.

#### 10. CULTURAL/HISTORICAL FEATURES

Please be advised that if section 38 of the National Heritage Resources Act 25 of 1999 is applicable to your proposal or alternatives, then you are requested to furnish this Department with written comment from the South African Heritage Resource Agency (SAHRA) – Attach comment in appropriate annexure

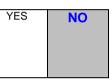

38. (1) Subject to the provisions of subsections (7), (8) and (9), any person who intends to undertake a development categorised as-

(a) the construction of a road, wall, powerline, pipeline, canal or other similar form of linear development or barrier exceeding 300m in length;

(b) the construction of a bridge or similar structure exceeding 50m in length;

- (c) any development or other activity which will change the character of a site-
  - (i) exceeding 5 000 m2 in extent; or
  - (ii) involving three or more existing erven or subdivisions thereof; or
  - (iii) involving three or more erven or divisions thereof which have been consolidated within the past five years; or
     (iv) the costs of which will exceed a sum set in terms of regulations by SAHRA or a provincial heritage resources authority;
- (d) the re-zoning of a site exceeding 10 000  $m^2$  in extent; or
- (e) any other category of development provided for in regulations by SAHRA or a provincial heritage resources authority, must at the very earliest stages of initiating such a development, notify the responsible heritage resources authority and furnish it with details regarding the location, nature and extent of the proposed development.

Are there any signs of culturally (aesthetic, social, spiritual, environmental) or historically significant elements, as defined in section 2 of the National Heritage Resources Act, 1999, (Act No. 25 of 1999), including archaeological or palaeontological sites, on or close (within 20m) to the site? Refer *Appendix F 1* for Heritage Impact Assessment by Dr J van Schalkwyk If YES, explain:

If uncertain, the Department may request that specialist input be provided to establish whether there is such a feature(s) present on or close to the site.

Briefly explain the findings of the specialist if one was already appointed:

Will any building or structure older than 60 years be affected in any way?

YES	NO
YES	NO

Is it necessary to apply for a permit in terms of the National Heritage Resources Act, 1999 (Act 25 of 1999)?

If yes, please attached the comments from SAHRA in the appropriate Appendix

## SECTION C: PUBLIC PARTICIPATION

#### 1. ADVERTISEMENT

The Environmental Assessment Practitioner must follow any relevant guidelines adopted by the competent authority in respect of public participation and must at least –

- 1(a) Fix a site notice at a conspicuous place, on the boundary of a property where it is intended to undertake the activity which states that an application will be submitted to the competent authority in terms of these regulations and which provides information on the proposed nature and location of the activity, where further information on the proposed activity can be obtained and the manner in which representations on the application may be made;
- 1(b) inform landowners and occupiers of adjacent land of the applicant's intention to submit an application to the competent authority;
- 1(c) inform landowners and occupiers of land within 100 metres of the boundary of the property where it is proposed to undertake the activity and whom may be directly affected by the proposed activity of the applicant's intention to submit an application to the competent authority;
- 1(d) inform the ward councillor and any organisation that represents the community in the area of the applicant's intention to submit an application to the competent authority;
- 1(e) inform the municipality which has jurisdiction over the area in which the proposed activity will be undertaken of the applicant's intention to submit an application to the competent authority; and
- 1(f) inform any organ of state that may have jurisdiction over any aspect of the activity of the applicant's intention to submit an application to the competent authority; and
- 1(g) place an advertisement in one local newspaper and any *Gazette* that is published specifically for the purpose of providing notice to the public of applications made in terms of these regulations.

#### 2. LOCAL AUTHORITY PARTICIPATION

Local authorities are key interested and affected parties in each application and no decision on any application will be made before the relevant local authority is provided with the opportunity to give input. The planning and the environmental sections of the local authority must be informed of the application at least thirty (30) calendar days before the submission of the application to the competent authority (GDARD).

Has any comment been received from the local authority?

If "YES", briefly describe the comment below (also attach any correspondence to and from the local authority to this application):

If "NO" briefly explain why no comments have been received The Local Authority is afforded the opportunity to comment on this Draft Basic Assessment Report.

#### 3. CONSULTATION WITH OTHER STAKEHOLDERS

Any stakeholder that has a direct interest in the activity, site or property, such as servitude holders and service providers, should be informed of the application at least thirty (30) calendar days before the submission of the application and be provided with the opportunity to comment.

Has any comment been received from stakeholders?

YES	NO

If "YES", briefly describe the feedback below (also attach copies of any correspondence to and from the stakeholders to this application):

	Mr	Andre Booyens
		Request to be registered as I&AP
		I will support the development right as my property is connected to the property in
		question. I would also put my property up for development rights.
	Cllr	Mr DA Kayat Owner No. 10 Reid's Place
	•	Request to be registered as I&AP
		The development of the property above mine would certainly impact on the value of
		mine and those around mine. One of the main reasons for buying this particular
		property was that no one could build behind me
		I strongly oppose the development of this natural reserve. At the time I purchased my
		property (No. 10 Reid's Place), I made enquiries to purchase the stand (or even part
		thereof) directly above mine. I was outright refused and informed that under no
		circumstances would the property above mine ever be sold as it fell within the "green
		belt". How is it that the situation has since changed?
		Development of this untouched area will certainly impact negatively on the natural
		fauna and flora of this area
		What is the point of declaring a specific area as "Nature Reserve" to protect and
		conserve what's left of our wildlife if the rules are allowed to change to suite the
		flavour of the month? This proposed development must not, under any circumstance
		be allowed to proceed
	Jus	tice Maluleke Department of Water Affairs:
		Requested a copy of the Basic Assessment Report for review and comments
	Mr	GJ Kôhler:
		I oppose this development because of crime and security during construction, noise,
		dust and dirt. Increased trafficking in our peaceful area.
	•	I oppose this development because of spoilage to our nature reserve
		CW De Bruyn
		Please note that I am completely and categorically opposed to any development
		inside the MPE. Is this development inside the MPNE. If yes are you planning to
		proceed?
	Mrs	P Heunis City of Tshwane Environmental Management and Nature
		nservation
	•	Request to be registered as I&AP
		No development may occur within the green zone of the Magaliesburg Protected
		Natural Environment.
	Mr	J Wesson WESSA
		Please register WESSA and the Magaliesburg Protection Association as I&AP's.
		If I read this correctly the whole area is in the protected area and as such cannot
		happen. Please confirm.
		We have a bit of a problem as the main house is also illegal. When was it built as it
		is not on the Conservation map?
	•	Looking at the plan again they could build one dwelling on the property as it does not
1		extend beyond the MPNE.
		More houses are a problem unless they sub divide
	Mr	HAust
1		Define the second Construction of the second s

 Reids place no. 9 Property with a beautiful mountain view. Please keep it like that. (property next to EIA)

	Request to be registered as I&AP
•	We have been mandated by Dr RP Allden and Mrs Allden, the registered owners of
	the Remainder of Erf 30, Waverly, to register as I&AP's in this matter an
	furthermore to lodge an objection against the Basic Assessment. The reasons for th
	objection are as follows:
•	The proposed development will include the removal of approximately 4,2 hectares of
	sensitive and indigenous vegetation and the introduction of land uses that could
	result in significant harmful impacts to the environment.
•	The proposed development lies within the boundaries of the Magaliesberg Protecte
	Nature Environment, which is a nature reserve in the Republic of South Africa. Th
	Magaliesberg was proclaimed a Biosphere under UNESCO in 2006/2007. Land use
	within the Magaliesberg Protected Natural Environment is controlled by th
	Magaliesburg Biosphere Management Plan, 2011. According to the Land Us
	Guidelines for the Magaliesberg Biosphere, as contained in the Magaliesber
	Biosphere Management Plan, 2011, the area in which the proposed development
	envisaged has been earmarked as "Core Zone". The primary activities permitted i
	the Core Zone are conservation, research, education and nature-based ecotourism
	The proposed development is not in line with these development objectives.
	The subject property lies within Region 2 of the City of Tshwane Metropolita
	Municipality. In terms of the Regional Spatial Development Framework (RSDF) for
	Region 2, the area in which the proposed development is envisaged has been ea
	marked as "ridge". According to the RSDF, Sensitive ridge areas, such as the
	Magaliesberg Protected Nature Area is regarded as sensitive. All development w
	be restricted in terms of environmental considerations. These areas are important
	terms of nature conservation and must be managed to maintain the open space
	system within the urban environment, visual attractiveness and natural environment
	content/ eco system. The proposed development is not in line with thes
	development objectives.
	In terms of the Development Guidelines for Ridges, compiled by the Gauter
	Department of Agriculture and Rural Development, 2001, the part of the Magalieber
	nature reserve in which the development is proposed, has been classified as a class
	2 Ridge. The development guidelines for Class 2 ridges include: No furthe
	subdivision will be allowed and consolidation of subdivisions will be encouraged. No
	go development policy, low impact (tourism developments will be considered. The
	proposed development is not in line with these development objectives. The
	proposed development will set a precedent for further intrusive development into the
	Magaliesberg Protected Natural Environment. In light of the above factors, it
	evidenT that the Basic Assessment for the proposed development cannot be
	supported.
	WJ Van der Heever
	Please send document - need the copy of original approval supplied to previou
	owner (Nel) to prepare objection.
	RM Del Piccolo
•	That there must be no blasting.
	nelien Pretorius Eskom
•	Eskom is not affected.
	AC Arno
	Request to be registered as I&AP
Re	fer Appendix E10.

#### 4. GENERAL PUBLIC PARTICIPATION REQUIREMENTS

The Environmental Assessment Practitioner must ensure that the public participation is adequate and must determine whether a public meeting or any other additional measure is appropriate or not based on the particular nature of each case. Special attention should be given to the involvement of local community structures such as Ward Committees and ratepayers associations. Please note that public concerns that emerge at a later stage that should have been addressed may cause the competent authority to withdraw any authorisation it may have issued if it becomes apparent that the public participation process was inadequate.

The practitioner must record all comments and respond to each comment of the public / interested and affected party before the application is submitted. The comments and responses must be captured in a Comments and Responses Report as prescribed in the regulations and be attached to this application.

#### 5. APPENDICES FOR PUBLIC PARTICIPATION

All public participation information is to be attached in the appropriate Appendix. The information in this Appendix is to be ordered as detailed below

- Appendix E1: Proof of site notice
- Appendix E2: Written notices issued to those persons detailed in 1(b) to 1(f) above
- Appendix E3: Proof of newspaper advertisements
- Appendix E4: Communications to and from persons detailed in Point 2 and 3 above (no correspondence)
- Appendix E5: minutes of any public and or stakeholder meetings (as no public meetings have been undertaken)
- Appendix E6: Comments and Responses Report
- Appendix E7: Comments from I&APs on Basic Assessment (BA) Report (this is the draft basic assessment on which I&AP's are to comment)
- Appendix E8: Comments from I&APs on amendments to the BA report (there have been no amendment report for comment)
- Appendix E9: Copy of the register of I&APs
- Appendix E10: Comments from I&APs on the application (received during the initial public participation)
- Appendix E11: Other (no additional applicable information)

# SECTION D: RESOURCE USE AND PROCESS DETAILS

Note: Section D is to be completed for the proposal and alternative(s) (if necessary)

#### Instructions for completion of Section D for alternatives

- 1) For each alternative under investigation, where such alternatives will have different resource and process details (e.g. technology alternative), the entire Section D needs to be completed
- 4) Each alterative needs to be clearly indicated in the box below
- 5) Attach the above documents in a chronological order

Section D has been duplicated for alternatives "insert No. of duplicates" times (complete only when appropriate)

Section D Alternative No.

"insert alternative number" (complete only when appropriate for above)

#### 1. WASTE, EFFLUENT, AND EMISSION MANAGEMENT

#### Solid waste management

Will the activity produce solid construction waste during the construction/initiation phase?

YES	NO
	±20m <sup>3</sup>

If yes, what estimated quantity will be produced per month?		$\pm 20 \text{m}^3$
How will the construction solid waste be disposed of (describe)?		
No disposal of construction waste generated during the development phase	will take	place
within the boundaries of the Proposed Township. All such waste will be regu	ularly co	llected
and transported and disposed of at one of the CoT's licensed landfill site. All	vehicles	s used
will be as such that no spillage of waste could take place along any route trave	lled to d	ispose
of the waste.		
Where will the construction solid waste be disposed of (describe)?		
CoT's licensed landfill site.		
Will the activity produce solid waste during its operational phase?	YES	NO
If yes, what estimated quantity will be produced per month?	3	x 240I
	whee	ly bins
How will the solid waste be disposed of (describe)?		
Once developed the domestic waste will be collected at each individual	propert	y and
disposed of by the CoT's formal waste removal system.		-
Has the municipality or relevant service provider confirmed that sufficient air space exists for	YES	NO
treating/disposing of the solid waste to be generated by this activity?		
Where will the solid waste be disposed if it does not feed into a municipal waste stream (describe)?	-	
ΝΑ

#### 3. POWER SUPPLY

Please indicate the source of power supply eg. Municipality / Eskom / Renewable energy source
Municipality

If power supply is not available, where will power be sourced from?

#### 4. ENERGY EFFICIENCY

Describe the design measures, if any, that have been taken to ensure that the activity is energy efficient: Compact fluorescent/ low pressure sodium lamps to be utilized instead of incandescent lamps. Security lighting must only be utilized during the night time (unless in abnormal conditions that may require further lighting).

Describe how alternative energy sources have been taken into account or been built into the design of the activity, if any:

The use of alternative energy sources such as solar and gas will be encouraged. Natural ventilation within the buildings is to be optimized. Electrical design should contain low wattage fluorescent lamps, electronic control gear for

light fittings as well as power factor correction where applicable.

## SECTION E: IMPACT ASSESSMENT

The assessment of impacts must adhere to the minimum requirements in the EIA Regulations, 2006, and should take applicable official guidelines into account. The issues raised by interested and affected parties should also be addressed in the assessment of impacts.

#### 1. ISSUES RAISED BY INTERESTED AND AFFECTED PARTIES

Summarise the issues raised by interested and affected parties.

#### Mr Andre Booyens

- Request to be registered as I&AP
- I will support the development right as my property is connected to the property in question. I would also put my property up for development rights.

#### Cllr Mr DA Kayat Owner No. 10 Reid's Place

- Request to be registered as I&AP
- The development of the property above mine would certainly impact on the value of mine and those around mine. One of the main reasons for buying this particular property was that no one could build behind me
- I strongly oppose the development of this natural reserve. At the time I purchased my property (No. 10 Reid's Place), I made enquiries to purchase the stand (or even part thereof) directly above mine. I was outright refused and informed that under no circumstances would the property above mine ever be sold as it fell within the "green belt". How is it that the situation has since changed?
- Development of this untouched area will certainly impact negatively on the natural fauna and flora of this area
- What is the point of declaring a specific area as "Nature Reserve" to protect and conserve what's left of our wildlife if the rules are allowed to change to suite the flavour of the month? This proposed development must not, under any circumstance be allowed to proceed

#### Justice Maluleke Department of Water Affairs:

Requested a copy of the Basic Assessment Report for review and comments

#### Mr GJ Kôhler:

- I oppose this development because of crime and security during construction, noise, dust and dirt. Increased trafficking in our peaceful area.
- I oppose this development because of spoilage to our nature reserve

#### Mr CW De Bruyn

Please note that I am completely and categorically opposed to any development inside the MPE. Is this development inside the MPNE. If yes are you planning to proceed?

## Mrs P Heunis City of Tshwane Environmental Management and Nature Conservation

- Request to be registered as I&AP
- No development may occur within the green zone of the Magaliesburg Protected Natural Environment.

#### Mr J Wesson WESSA

- Please register WESSA and the Magaliesburg Protection Association as I&AP's.
- If I read this correctly the whole area is in the protected area and as such cannot happen. Please confirm.
- We have a bit of a problem as the main house is also illegal. When was it built as it is not on the Conservation map?
- Looking at the plan again they could build one dwelling on the property as it does not extend beyond the MPNE.
- More houses are a problem unless they sub divide

#### 🧕 Mr H Aust

 Reids place no. 9 Property with a beautiful mountain view. Please keep it like that. (property next to EIA)

#### Van Blommestein and Associates MD Nel

- Request to be registered as I&AP
- We have been mandated by Dr RP Allden and Mrs Allden, the registered owners of the Remainder of Erf 30, Waverly, to register as I&AP's in this matter and furthermore to lodge an objection against the Basic Assessment. The reasons for the objection

are as follows:

- The proposed development will include the removal of approximately 4,2 hectares of sensitive and indigenous vegetation and the introduction of land uses that could result in significant harmful impacts to the environment.
- The proposed development lies within the boundaries of the Magaliesberg Protected Nature Environment, which is a nature reserve in the Republic of South Africa. The Magaliesberg was proclaimed a Biosphere under UNESCO in 2006/2007. Land uses within the Magaliesberg Protected Natural Environment is controlled by the Magaliesburg Biosphere Management Plan, 2011. According to the Land Use Guidelines for the Magaliesberg Biosphere, as contained in the Magaliesberg Biosphere Management Plan, 2011, the area in which the proposed development is envisaged has been earmarked as "Core Zone". The primary activities permitted in the Core Zone are conservation, research, education and nature-based ecotourism. The proposed development is not in line with these development objectives.
- The subject property lies within Region 2 of the City of Tshwane Metropolitan Municipality. In terms of the Regional Spatial Development Framework (RSDF) for Region 2, the area in which the proposed development is envisaged has been ear marked as "ridge". According to the RSDF, Sensitive ridge areas, such as the Magaliesberg Protected Nature Area is regarded as sensitive. All development will be restricted in terms of environmental considerations. These areas are important in terms of nature conservation and must be managed to maintain the open space system within the urban environment, visual attractiveness and natural environmental content/ eco system. The proposed development is not in line with these development objectives.
- In terms of the Development Guidelines for Ridges, compiled by the Gauteng Department of Agriculture and Rural Development, 2001, the part of the Magalieberg nature reserve in which the development is proposed, has been classified as a class 2 Ridge. The development guidelines for Class 2 ridges include: No further subdivision will be allowed and consolidation of subdivisions will be encouraged. No-go development policy, low impact (tourism developments will be considered. The proposed development will set a precedent for further intrusive development into the Magaliesberg Protected Natural Environment. In light of the above factors, it is evidenT that the Basic Assessment for the proposed development cannot be supported.

#### Mr WJ Van der Heever

- Please send document need the copy of original approval supplied to previous owner (Nel) to prepare objection.
- Mr RM Del Piccolo
- That there must be no blasting.

#### Annelien Pretorius Eskom

- Eskom is not affected.
- Mr AC Arno

 Request to be registered as I&AP Refer Appendix E10.

Summary of response from the practitioner to the issues raised by the interested and affected parties

(A full response must be provided in the Comments and Response Report that must be attached to this report):

#### Mr Andre Booyens

Request to be registered as I&AP

- Added onto the database of interested and affected parties and will be kept up to date and afforded an opportunity to comment on all reports during the Basic Assessment process.
- I will support the development right as my property is connected to the property in question. I would also put my property up for development rights. *Noted.*

#### Cllr Mr DA Kayat Owner No. 10 Reid's Place

Request to be registered as I&AP

Added onto the database of interested and affected parties and will be kept up to date and afforded an opportunity to comment on all reports during the Basic Assessment process.

- The development of the property above mine would certainly impact on the value of • mine and those around mine. One of the main reasons for buying this particular property was that no one could build behind me Property values are affected by visual impact, safety and security as well as noise. The negative impacts associated with these aspects have been mitigated against accordingly - Refer to the EMPr attached as Appendix H. Further to this, the proposed properties will gain access from an existing right of way servitude and the new servitude to the proposed 3 residential properties will not be directly adjacent to No 10 Reid's Place. I strongly oppose the development of this natural reserve. At the time I purchased my • property (No. 10 Reid's Place). I made enquiries to purchase the stand (or even part thereof) directly above mine. I was outright refused and informed that under no circumstances would the property above mine ever be sold as it fell within the "green belt". How is it that the situation has since changed? The subject property has been privately owned by the applicant since 1999, and since it is a farm portion, it was not included into the previous Township known as Montana Extension 5 and is zoned Agricultural. If someone wanted to purchase a part thereof, you would have been instructed to also go through a township application. We therefore assume that could be a reason why you would not have been able to purchase a part thereof. The applicant identified a need to build 3 Residential 1 erven on the property in order to accommodate her children on the same property. A township application was submitted to the City of Tshwane Metropolitan Municipality dated 14 November 2012. It is acknowledge that the property falls within the Green belt and therefore the appropriate processes in terms of the EIA Regulations are being followed in order to determine whether the proposed development would be approved by the Gauteng Department of Agriculture and Rural Development (GDARD). It must also be noted that environmental legislation only came into effect in terms of the Environmental Conservation Act between 1997 and 2002. • Development of this untouched area will certainly impact negatively on the natural fauna and flora of this area According to the conclusion in the Biodiversity Report compiled by EcoAgent Ecology and Biodiversity Consultants (Refer Appendix H), the intended development will not result in a loss of significantly large ecological sensitive and important habitat units, ecosystem function (e.g. reduction in water quality, connectivity, soil pollution, pollination), significant loss of mammal, bird or herpetofauna habitat, nor of loss/displacement of threatened or protected species. Please also note that the EMPr attached hereto as Appendix H contains site specific mitigation measures that must be implemented in order to reduce
  - negative impacts on fauna and flora during the construction and operational phase
     What is the point of declaring a specific area as "Nature Reserve" to protect and conserve what's left of our wildlife if the rules are allowed to change to suite the flavour of the month? This proposed development must not, under any circumstance be allowed to proceed

The property is located within the green belt of the Magaliesberg Protected Natural Environment (MPNE). The site falls within a Class 2 Ridge (Gauteng Hills and Ridges Policy, 2001) and therefore should any development be proposed within this area the relevant legal processes must be undertaken in order to obtain authorisation from the relevant Provincial and local authorities to proceed with such. This Basic Assessment Report forms part of the environmental authorisation application to GDARD, who are vested with the decision making power to grant or deny authorisation. To date the Basic Assessment process is being carried out whereby the applicant is applying for environmental authorisation to the GDARD. The decision making power to grant or deny authorisation of the project lies with the GDARD.

#### Justice Maluleke Department of Water Affairs:

 Requested a copy of the Basic Assessment Report for review and comments Mr Maluleke is herewith provided with a copy of the Draft Basic Assessment Report for review and comment.

#### Mr GJ Kôhler:

• I oppose this development because of crime and security during construction, noise, dust and dirt. Increased trafficking in our peaceful area.

	Noted. Mitigation measures pertaining to crime, security, noise, dust and traffic have
	been included in the EMPr attached as Appendix H.
	I oppose this development because of spoilage to our nature reserve
	It must be noted that the area proposed to be developed is located between the existing
	house on the subject property and the built-up edge of Montana Park X 5. This area is
	largely transformed by the existing residence and garden and it is not anticipated to create spoilage of the nature reserve
Mr	CW De Bruyn
•	Please note that I am completely and categorically opposed to any development
	inside the MPE. Is this development inside the MPNE. If yes are you planning to
	proceed?
	The property is located within the green belt of the MPNE. The site falls within a Class 2
	Ridge (Gauteng Hills and Ridges Policy, 2001) and therefore should any development be
	proposed within this area the relevant legal processes must be undertaken in order to
	obtain authorisation from the relevant Provincial and local authorities to proceed with
	such. To date the Basic Assessment process is being carried out whereby the applicant is applying for environmental authorisation to the GDARD. The decision making power to
	grant or deny authorisation of the project lies with the GDARD, and not with ILA.
Mr	s P Heunis City of Tshwane Environmental Management and Nature
	inservation
•	Request to be registered as I&AP
	Added onto the database of interested and affected parties and will be kept up to date
	and afforded an opportunity to comment on all reports during the Basic Assessment
_	process.
	No development may occur within the green zone of the Magaliesburg Protected Natural Environment.
	It is noted that the application site is situated within the proclaimed protected area of the
	Magaliesberg Protected Natural Environment. Application for development on the subject
	property is being made for the area that is situated between the existing residential unit
	on the property and the township boundary of Montana Park Ext 5. ILA together with the
	applicant has undertaken negotiations with the City of Tshwane (Mr Alexander Heunis
	and Mr Johannes Prinsloo) in this regard. The CoT indicated that no development was
	allowed within a proclaimed protected area. It was however confirmed that the portion
	south of the existing dwelling was disturbed due to human activity and some of these
	areas south of the existing dwelling had been excluded as sensitive areas in the latest
	Tshwane Bioregional Plan. Due to the fact that the application portion and the existing
	dwelling can be considered as part of the urban environment associated with the existing
	developments further south, the CoT proposed that the property owner consider an offset
	proposal. Such a proposal would entail that the CoT would consider supporting the
	development of the 3 residential erven based on the condition that the remainder of the property which has not been disturbed by human activity is availed to the CoT for zoning
	as Public Open Space and conservation purposes. This would contribute to the CoT's
	objective to protect, manage and conserve the MPNE. With such an offset the MPNE line
	which currently includes the existing dwelling will be re-proclaimed to exclude the portion
	of the property where the existing dwelling is situated up to its southern boundary.
	An application for development within the Magaliesberg Protected Natural Environment in
	terms of Administrator's Notice 127 of 4 May 1994 and the Environmental Conservation
	Act 1989 (Act 73 of 1989) will also be submitted to the Directorate of Nature
	Conservation at the Gauteng Provincial Government.
Mr	J Wesson WESSA
	Please register WESSA and the Magaliesburg Protection Association as I&AP's.
	Added onto the database of interested and affected parties and will be kept up to date
	and afforded an opportunity to comment on all reports during the Basic Assessment
	process. If I read this correctly the whole area is in the protected area and as such cannot
	happen. Please confirm.
	It is noted that the application site is situated within the proclaimed protected area of the
	Magaliesberg Protected Natural Environment. Application for development on the subject
	property is being made for the area that is situated between the existing residential unit

on the property and the township boundary of Montana Park Ext 5. ILA together with the applicant has undertaken negotiations with the City of Tshwane (Mr Alexander Heunis and Mr Johannes Prinsloo) in this regard. The CoT indicated that no development was allowed within a proclaimed protected area. It was however confirmed that the portion south of the existing dwelling was disturbed due to human activity and some of these areas south of the existing dwelling had been excluded as sensitive areas in the latest Tshwane Bioregional Plan. Due to the fact that the application portion and the existing dwelling can be considered as part of the urban environment associated with the existing developments further south, the CoT proposed that the property owner consider an offset proposal. Such a proposal would entail that the CoT would consider supporting the development of the 3 residential erven based on the condition that the remainder of the property which has not been disturbed by human activity is availed to the CoT for zoning as Public Open Space and conservation purposes. This would contribute to the CoT's objective to protect, manage and conserve the MPNE. With such an offset the MPNE line which currently includes the existing dwelling will be re-proclaimed to exclude the portion of the property where the existing dwelling is situated up to its southern boundary.

An application for development within the Magaliesberg Protected Natural Environment in terms of Administrator's Notice 127 of 4 May 1994 and the Environmental Conservation Act 1989 (Act 73 of 1989) will also be submitted to the Directorate of Nature Conservation at the Gauteng Provincial Government.

We have a bit of a problem as the main house is also illegal. When was it built as it is not on the Conservation map? Looking at the plan again they could build one dwelling on the property as it does not extend beyond the MPNE. More houses are a problem unless they sub divide

The owner has confirmed that the house was built between 1995/1996. It did not require environmental authorisation at that stage as ECA only came into effect between 1997 and 2002.

#### 🧕 Mr H Aust

 Reids place no. 9 Property with a beautiful mountain view. Please keep it like that. (property next to EIA)

Mitigation measures have been included in the EMPr (Appendix H) to reduce visual impacts related to the proposed development. It must be noted that the area proposed to be developed is located between the existing house on the subject property and the built-up edge of Montana Park X 5. No activities are proposed to be undertaken above the existing residential unit on the property

#### **Van Blommestein and Associates MD Nel**

Request to be registered as I&AP

Added onto the database of interested and affected parties and will be kept up to date and afforded an opportunity to comment on all reports during the Basic Assessment process.

<sup>3</sup> We have been mandated by Dr RP Allden and Mrs Allden, the registered owners of the Remainder of Erf 30, Waverly, to register as I&AP's in this matter and furthermore to lodge an objection against the Basic Assessment. The reasons for the objection are as follows: The proposed development will include the removal of approximately 4,2 hectares of sensitive and indigenous vegetation and the introduction of land uses that could result in significant harmful impacts to the environment.

The development will not entail the removal of 4.2 hectares of vegetation. The proposed residential erven will only entail a total footprint area of 3438m2 and a further 779m2 allocated to services. The 3 proposed residential erven will be just over 1000m<sup>2</sup> each to fit in with the general density of Montana X 5. No other land uses are proposed.

The proposed development lies within the boundaries of the Magaliesberg Protected Nature Environment, which is a nature reserve in the Republic of South Africa. The Magaliesberg was proclaimed a Biosphere under UNESCO in 2006/2007. Land uses within the Magaliesberg Protected Natural Environment is controlled by the Magaliesburg Biosphere Management Plan, 2011. According to the Land Use Guidelines for the Magaliesberg Biosphere, as contained in the Magaliesberg Biosphere Management Plan, 2011, the area in which the proposed development is envisaged has been earmarked as "Core Zone". The primary activities permitted in the Core Zone are conservation, research, education and nature-based ecotourism. The proposed development is not in line with these development objectives.

The subject property lies within Region 2 of the City of Tshwane Metropolitan . Municipality. In terms of the Regional Spatial Development Framework (RSDF) for Region 2, the area in which the proposed development is envisaged has been ear marked as "ridge". According to the RSDF, Sensitive ridge areas, such as the Magaliesberg Protected Nature Area is regarded as sensitive. All development will be restricted in terms of environmental considerations. These areas are important in terms of nature conservation and must be managed to maintain the open space system within the urban environment, visual attractiveness and natural environmental content/ eco system. The proposed development is not in line with these development objectives. In terms of the Development Guidelines for Ridges, compiled by the Gauteng Department of Agriculture and Rural Development, 2001, the part of the Magalieberg nature reserve in which the development is proposed, has been classified as a class 2 Ridge. The development guidelines for Class 2 ridges include: No further subdivision will be allowed and consolidation of subdivisions will be encouraged. No-go development policy, low impact (tourism developments will be considered. The proposed development is not in line with these development objectives. The proposed development will set a precedent for further intrusive development into the Magaliesberg Protected Natural Environment. In light of the above factors, it is evident that the Basic Assessment for the proposed development cannot be supported.

The subject property is characterised by an existing residential unit located towards the south of the site (closer to the mountain). The proposed residential erven are proposed to be built in the area between the existing house and current built-up edge of Montana Park X 5. No development is proposed to take place beyond the existing house. As the landowner of the property the applicant should be entitled to apply for authorisation of the residential component although it may not be in line with activities permitted in the core zone, the application portion and the existing dwelling can be considered as part of the urban environment associated with the existing developments further south of the site. The proposed 3 residential erven is situated between the existing residential house and Montana X 5.

#### Mr WJ Van der Heever

Please send document - need the copy of original approval supplied to previous owner (Nel) to prepare objection.

ILA is not in possession of any previous approvals. Mr van der Heever is herewith provided with an opportunity to provide his comments of this Draft Basic Assessment Report.

#### Mr RM Del Piccolo

That there must be no blasting.

No blasting will be allowed during the construction phase.

#### Annelien Pretorius Eskom

Eskom is not affected.

#### Noted.

- Mr AC Arno
- Request to be registered as I&AP

Added onto the database of interested and affected parties and will be kept up to date and afforded an opportunity to comment on all reports during the Basic Assessment process.

Refer Appendix E6 for Comments and Response Report.

## 2. IMPACTS THAT MAY RESULT FROM THE CONSTRUCTION AND OPERATIONAL PHASE

Briefly describe the methodology utilised in the rating of significance of impacts

The Significance Assessment Methodology in accordance with the DEAT (2006) Guideline Document 5 (Assessment of Impacts) is being followed. The mentioned document states that the significance of impacts can be determined through a synthesis of the aspects produced in terms of the nature, duration, intensity, extent and probability of identified impacts. Furthermore the significance of an impact is the product of a probability rating and a severity rating. A detailed

	cription of th	no montiono	d methodology fo	llows:

Tab	Lo Me Hij	F w Severity edium Seve gh Severity	(Rating 2) rity (Rating 3)	Calculated values 2 to 4	

A . Pr	<b>GNIFICANCE RATING</b> Significance Rating is calculated by multiplying the Severity Rating with the obability Rating. The significance rating should influence the development project as scribed below:
•	<ul> <li>Low significance (calculated Significance Rating 4 to 6)</li> <li>Positive and negative impacts of low significance should have no significant influence on the proposed development project.</li> </ul>
•	<ul> <li>Medium significance (calculated Significance Rating ≥ 7 to 12)</li> <li>Positive impact: Should weigh towards a decision to continue</li> <li>Negative impact: Should be mitigated before project can be approved.</li> </ul>
•	<ul> <li>High significance (calculated Significance Rating ≥ 13 to 18)</li> <li>Positive impact: Should weigh towards a decision to continue, should be enhanced in final design.</li> <li>Negative impact: Should weigh towards a decision to terminate proposal, or mitigation should be performed to reduce significance to at least a low significance rating.</li> </ul>
•	<ul> <li>Very High significance (calculated Significance Rating ≥ 19 to 25)</li> <li>Positive impact: Continue</li> <li>Negative impact: If mitigation cannot be implemented effectively, proposal should be terminated.</li> </ul>

Briefly describe and compare the potential impacts (as appropriate), significance rating of impacts, proposed mitigation and significance rating of impacts after mitigation that are likely to occur as a result of the construction phase for the various alternatives of the proposed development. This must include an assessment of the significance of all impacts.

## Alternative 1: <u>Proposal</u>: Establishment of 3 'Residential 1' stands (Conventional foundations) and an Erf zoned Special for services

Increased paved areas	<b>12 Medium</b> P – 4 I – 2, D – 4, SF – 8 SR – 3	Limit hard services and make use of materials that are pervious or absorbent. It is imperative that adequate surface and sub-surface drainage conditions be provided prior or during development of the site. Drainage systems must be designed and implemented. Use of soft landscaping to be utilised as far as possible Improve by implementation of appropriate landscaping (use of indigenous species)	6 Low P – 2 I – 2, D – 4, SF – 8 SR – 3
Energy Consumption	<b>12 Medium</b> P – 4 I – 2, D – 4, SF – 8 SR – 3	Conservation of energy or the utilisation of renewable and sustainable energy technologies is encouraged. This includes solar panels that generate and store electricity in suitable battery packs, solar water heater(s), backed up with gas, as well as gas appliances. The storage of gas must conform to the stipulations laid out in the OHSA. All lights used for non-security purposes should be energy efficient for example compact fluorescent lights (CFL). Outside lights will have to be downward shining (eyelid type), low wattage and should not be positioned higher than 1 m above the ground surface. Fluorescent lamps give five times the light and last up to 10 times as long as ordinary bulbs. Solar water heater(s) conserve energy and can be backed up with gas or electric geysers. Installing a geyser blanket on geysers and hot water storage tanks will reduce the amount of heat lost by the geyser to cold air outside and thus conserves energy. Hot water pipes should also be insulated to prevent heat loss. Energy efficient heaters and air conditioners should be purchased	6 Low P-2 I-2, D-4, SF-8 SR-3

Alternative 2: Establishmer	nt of 3 'Residential 1' stan	ds on stilts or similar and an	Erf zoned Special for services

	P – 4 or similar lir – 4, SF – 8 vegetation an

vehicles, will cause an increase in		watered/ wetted on a regular,	
stormwater run-off (sheet erosion)		monitored basis to prevent dust	
as well as make soil susceptible to	(m)	formation.	
wind erosion (including dust		Areas where services are to be	
pollution) (cumulative impact)		implemented must be clearly demarcated	
		Contracts with contractors to	
		include penalties related to	
		environmental damage caused by	
		such contractors.	
		Construction schedules to indicate	
		which areas can be cleared for	
		construction work	
		Installation of all underground	
		services must be coordinated to	
		occur simultaneously wherever	
		possible. Trenches must be backfilled and compacted to	
		backfilled and compacted to appropriate compaction densities	
		as soon as possible.	
		The position of the site camp	
		should be determined and fenced	
		off from the remaining property to	
		contain the spread of material, etc.	
		The area of the construction camp	
		must be rehabilitated with plants	
		harvested in the pre-construction	
		phase or new indigenous plants	
		which specifically occur in the immediate area of the construction	
		area.	
		Regular inspections to ensure	
		compliance to these requirements.	
		Inspections must occur on an	
		ongoing basis, with monthly audit	
		reports being compiled and	
		submitted to the GDARD.	
		Where rehabilitation of cleared	
		areas is planned, topsoil must be preserved for this purpose	
		The top 20 cm of soil must be	
		stripped as fertile top soil and	
		stockpiled aside at specifically	
		designated areas to be used in the	
		rehabilitation of the site in the final	
		phase of construction. Suitable	
		storage areas must be identified	
		within disturbed area, in	
		consultation with the ECO, prior to	
		commencement of construction. It is important that the footprint of	
		disturbance by heavy machinery	
		during construction be limited, in	
		order to ensure a quick recovery	
		of the site.	
		Earthworks and changes to the	
		natural form of the ground be kept	
	-	to a minimum.	
		Where embankments higher than	
		1,200mm are created, these	
		should be contoured to	
		approximate the natural form of the landscape.	
		Landscapes should be terraced.	
		Access roads for earthmoving	
		equipment and delivery of	
		construction material must be	
		clearly designated.

# 3. IMPACTS THAT MAY RESULT FROM THE DECOMISSIONING AND CLOSURE PHASE

Briefly describe and compare the potential impacts (as appropriate), significance rating of impacts, proposed mitigation and significance rating of impacts after mitigation that are likely to occur as a result of the decommissioning and closure phase for the various alternatives of the proposed development. This must include an assessment of the significance of all impacts.

Alternative 1 (Proposal) Potential impacts: Significance Proposed mitigation: Significance rating of rating of impacts: impacts after mitigation: **BENEFICIAL IMPACTS** 15 High Jobs and skills development 10 Medium As far as reasonably possible people P – 5 from surrounding communities must P-5I - 2, D - 2,I – 2, D – 4, SF be employed by the contractor and SF – 4 sub-contractors. This should be - 8 **SR** – 2 included in the contract upon SR – 3 appointment of successful tenderer. ADVERSE IMPACTS and Generation of waste rubble 12 Medium Where feasible, waste material must 4 Low following decommissioning of existing be sorted, separated and recycled. structures. Failure to dispose of waste All material that cannot be recycled appropriately and at an authorized or re-used must be collected and facility will result in the adverse impacts disposed of at a licensed building in terms of generating a polluted site, rubble disposal site with downstream effects on water quality and a visually unpleasing environment Decommissioning activities will result in Decommissioning 10 Medium 8 Medium should be noise levels that may be unacceptable to completed as soon as possible Neighbouring community must be advised of the decommissioning neighbours schedule Decommissioning must be limited to 07:00-18:00 during weekdays and 08:00-13:00 on weekends

#### Alternative 2

Potential impacts: Potential impacts during decommissioning will be the same as identified in proposal specified above (Alternative 1)	Significance rating of impacts:	Proposed mitigation:	Significance rating of impacts after mitigation:
--	---------------------------------------	----------------------	---

List any specialist reports that were used to fill in the above tables. Such reports are to be attached in the appropriate Appendix.

None

#### 4. CUMULATIVE IMPACTS

Describe potential impacts that, on their own may not be significant, but is significant when added to the impact of other activities or existing impacts in the environment. Substantiate response:

#### Adverse:

- Increase in traffic along Reid's Place
- De-vegetation of areas due to construction of infrastructure, site clearance, installation of services, movement of heavy vehicles, will result in increase stormwater run-off (sheet erosion) as well as makes soil susceptible to wind and water erosion (including dust pollution)
- Burden of additional services to be delivered by local Municipality
- Increased stormwater run-off;
- Loss of potential habitat.

#### **Beneficial:**

- Contribution to municipal infrastructure
- Community and local economic development
- Removal of exotic plant species and rehabilitation of disturbed areas
- Off set would contribute to the CoT's objective to protect, manage and conserve the MPNE

#### 5. ENVIRONMENTAL IMPACT STATEMENT

Taking the assessment of potential impacts into account, please provide an environmental impact statement that sums up the impact that the proposal and its alternatives may have on the environment after the management and mitigation of impacts have been taken into account with specific reference to types of impact, duration of impacts, likelihood of potential impacts actually occurring and the significance of impacts.

# <u>Alternative 1 Proposal:</u> Establishment of 3 'Residential 1' stands (Conventional foundations) and an Erf zoned Special for services

Adverse and beneficial impacts were identified for the proposed activity. The following adverse impacts have been identified (note that the significance rating indicated is after implementation of management and mitigation measures): The potential adverse impacts associated with this proposal can be successfully mitigated to a low significance with the exception of de-vegetation of area of construction and disturbance in ecological processes and functioning as well as visual intrusion, light and noise pollution which can be mitigated to a level of medium significance.

#### **CONSTRUCTION PHASE:**

- De-vegetation of area of construction (MEDIUM)
- Disturbance in ecological processes and functioning(MEDIUM)
- Nuisance to neighbours (LOW)
- Dust to be generated during construction activities (LOW)
- Heavy vehicle traffic in Reid's Place (LOW)
- Establishment of material stockpile areas and other storage areas for building material (LOW)
- Temporary chemical sanitation (toilet facilities) could contaminate and impact on soil (LOW)
- Crime may increase as a result of contract work in the area (LOW)
- Mammalian and avian species will move to adjacent properties during the construction phase (LOW)
- Waste management (LOW)
- Unsupervised and misuse of fire on site (LOW)
- Possible damage/ loss of subterranean artefacts and archaeological sites (LOW)
- Damage to and removal of conservation worthy vegetation communities (LOW)

## **OPERATIONAL PHASE:**

- Visual intrusion, Light and noise pollution (MEDIUM)
- Waste Generation & Disposal (LOW)
- Increased paved areas (LOW)
- Energy Consumption (LOW)

With implementation of the mitigation measures as indicated in Section E, all of the

anticipated adverse impacts can be successfully mitigated to a low significance with the exception of de-vegetation of area of construction and disturbance in ecological processes and functioning as well as visual intrusion, light and noise pollution which will result in an impact of medium significance. It is recommended that the attached EMPr (*Appendix H*) be included in the conditions of the Environmental Authorisation to ensure that activities on site are adequately managed and monitored.

#### The following <u>beneficial impacts</u> have been identified: CONSTRUCTION PHASE:

Removal of exotic plant species and establishment of indigenous vegetation (MEDIUM);

Skills development and job opportunities. (HIGH); and

#### **OPERATIONAL PHASE:**

Creation of Job Opportunities and Economic Upliftment (VERY HIGH)

Alternative 2: Establishment of 3 'Residential 1' <u>stands on stilts or similar</u> and an Erf zoned Special for services

The potential negative impacts associated with this proposal can be mitigated to decrease their significance *(Refer to Section E2 above).* This alternative includes the building of the three residential erven on stilts or similar. Adverse impacts can however be mitigated to a level of low significance, namely:

### **CONSTRUCTION PHASE:**

- De-vegetation of area of construction due to site clearance (LOW)
- Disturbance in ecological processes and functioning (LOW)

#### **OPERATIONAL PHASE:**

Visual Intrusion, Light & Noise Pollution (LOW)

#### No-go (compulsory)

The direct impacts associated with the proposed township not being constructed include:

- An increase in the number of aliens plants on the site as well as the possible infestation of neighbouring properties along MPNE.
- The positive socio-economic activities in terms of job creation would not occur.
- In essence, the no-go alternative would ultimately imply that the state of the environment would be retained as it is presently, with obvious advantages and disadvantages to the natural environment.
- Should the current status quo of the application site and associated activities remain, the adverse impacts associated with construction activities would not occur
- The objective by CoT to protect, manage and conserve the MPNE would not be realised (off set proposal)

Identified impacts during the operational phase (Proposal) are low (with exception to visual intrusion, light and noise pollution which can be mitigated to a level of medium significance) and therefore do not weigh towards the no-go option being considered a feasible alternative.

## 6. IMPACT SUMMARY OF THE PROPOSAL OR PREFERRED ALTERNATIVE

## For proposal:

## Proposal

Adverse and beneficial impacts were identified for the proposed activity. The following adverse impacts have been identified (note that the significance rating indicated is after implementation of management and mitigation measures): The potential adverse impacts associated with this proposal can be successfully mitigated to a low significance with the exception of de-vegetation of area of construction and disturbance in ecological processes and functioning as well as visual intrusion, light and noise pollution which can be mitigated to a level of medium significance.

#### **CONSTRUCTION PHASE:**

De-vegetation of area of construction (MEDIUM)

- Disturbance in ecological processes and functioning(MEDIUM)
- Nuisance to neighbours (LOW)
- Dust to be generated during construction activities (LOW)
- Heavy vehicle traffic in Reid's Place (LOW)
- Establishment of material stockpile areas and other storage areas for building material (LOW)
- Temporary chemical sanitation (toilet facilities) could contaminate and impact on soil (LOW)
- Crime may increase as a result of contract work in the area (LOW)
- Mammalian and avian species will move to adjacent properties during the construction phase (LOW)
- Waste management (LOW)
- Unsupervised and misuse of fire on site (LOW)
- Possible damage/ loss of subterranean artefacts and archaeological sites (LOW)
- Damage to and removal of conservation worthy vegetation communities (LOW)

#### **OPERATIONAL PHASE:**

- Visual intrusion, Light and noise pollution (MEDIUM)
- Waste Generation & Disposal (LOW)
- Increased paved areas (LOW)
- Energy Consumption (LOW)

With implementation of the mitigation measures as indicated in Section E, all of the anticipated adverse impacts can be successfully mitigated to a low significance with the exception of de-vegetation of area of construction and disturbance in ecological processes and functioning as well as visual intrusion, light and noise pollution which will result in an impact of medium significance. It is recommended that the attached EMPr (*Appendix H*) be included in the conditions of the Environmental Authorisation to ensure that activities on site are adequately managed and monitored.

#### The following <u>beneficial impacts</u> have been identified: CONSTRUCTION PHASE:

- Removal of exotic plant species and establishment of indigenous vegetation (MEDIUM);
- Skills development and job opportunities. (HIGH); and

#### **OPERATIONAL PHASE:**

Creation of Job Opportunities and Economic Upliftment (VERY HIGH)

#### Alternative: 2

The potential negative impacts associated with this proposal can be mitigated to decrease their significance *(Refer to Section E2 above).* This alternative includes the building of the three residential erven on stilts or similar. Adverse impacts can however be mitigated to a level of low significance, namely:

#### **CONSTRUCTION PHASE:**

De-vegetation of area of construction due to site clearance (LOW)
 Disturbance in ecological processes and functioning (LOW)

#### **OPERATIONAL PHASE:**

Visual Intrusion, Light & Noise Pollution (LOW)

Having assessed the significance of impacts of the proposal and alternative(s), please provide an overall summary and reasons for selecting the proposal or preferred alternative.

#### SUMMARY AND CONCLUSION

The application is considered necessary and desirable for the following reasons:

Alien vegetation will be removed and natural open spaces rehabilitated.

- The impacts identified in Section E 2 of the report can be satisfactorily mitigated to ensure that the overall impact of the proposed development has a medium to low significance.
- Local communities stand to benefit from employment opportunities which will arise during the construction and operational phases of the development.

The objective by CoT to protect, manage and conserve the MPNE would not be realised (off set proposal).

It is therefore considered that this application has merit and is worthy of approval.

## 7. RECOMMENDATION OF PRACTITIONER

Is the information contained in this report and the documentation attached hereto sufficient to make a decision in respect of the activity applied for (in the view of the Environmental Assessment Practitioner).

If "NO", indicate the aspects that require further assessment before a decision can be made (list the aspects that require further assessment):

If "YES", please list any recommended conditions, including mitigation measures that should be considered for inclusion in any authorisation that may be granted by the competent authority in respect of the application:

- The Environmental Management Programme must be made a condition of the authorization.
- A further condition of the authorization must be for the applicant to honour the off set proposal as agreed with the CoT.
- Monthly environmental audits must be submitted to the GDARD during the construction phase.
- All mitigation measures/ recommendations contained within the specialist reports pertaining to this project must be strictly adhered to.

#### 8. ENVIRONMENTAL MANAGEMENT PROGRAMME (EMPr)

If the EAP answers yes to Point 7 above then an EMP is to be attached to this report as an Appendix

EMPr attached

## SECTION F: APPENDIXES

The following appendixes must be attached as appropriate:

It is required that if more than one item is enclosed that a table of contents is included in the appendix Appendix A: Layout Plan

**Appendix B: Site Photographs** 

Appendix C: Facility illustration(s)

Appendix D: Route position information

#### Appendix E: Public participation information

Appendix E1:	Proof of site notice
Appendix E2:	written notices issued to those persons detailed in 1(b) to 1(f) above
Appendix E3:	Proof of newspaper advertisements
Appendix E4:	Communications to and from persons detailed in Point 2 and 3 above
Appendix E5:	minutes of any public and or stakeholder meetings
Appendix E6:	Comments and Responses Report
Appendix E7:	Comments from I&APs on Basic Assessment (BA) Report
Appendix E8:	Comments from I&APs on amendments to the BA report
Appendix E9:	Copy of the register of I&APs
Appendix E10:	Comments from I&APs on the application (received during the initial
	public participation)
Appendix E11:	Other

# Appendix F: Water use license(s), SAHRA information, service letters from municipalities, water supply information
