

Anne-Mari White

Environmental Specialist

Ms. White's consulting experience includes basic environmental impact assessments (BAs), environmental impact assessments (EIAs), environmental compliance, public participation processes (PPPs), environmental management plans (EMPs), water licensing and authorisations and waste licence applications for various projects, ranging from abattoirs and township establishments to power station developments.

Anne-Mari completed her Bachelor of Science in Environmental Management at the University of South Africa (UNISA) in 2007. In addition, she has done short courses in soil classifications and wetland delineations at Terrasoil; geographic information systems (GIS) at the University of KwaZulu-Natal (UKZN) and EIAs at the North-West University (NWU) in South Africa. She is also registered as a natural scientist with the South African Council for Scientific Natural Professionals (SACNASP) and is a member of the International Association for Impact Assessments (IAIA).

Over the 12 years, Ms. White gained extensive experience in the following fields:

- Environmental Impact Assessments
- Environmental Monitoring and Control
- Environmental Management Plans
- Public Consultation
- Water Use License Applications
