Assistant Director
Department of Forestry, Fisheries and the Environment: Integrated Environmental Authorisation
Cnr. Steve Biko and Soutpansberg Road
473 Steve Biko, Arcadia,
Pretoria, 8000

Attention: Mohammad Essop

Dear Mohammed

**Environmental Authorisation for the Basic Assessment for the Stilfontein Photovoltaic Facilities Cluster and Associated Infrastructure, North West Province:
Site Sensitivity Verification Report for Stilfontein PV**

1. Introduction

South Africa Mainstream Renewable Power (Pty) Ltd (Mainstream) propose to construct up to nine Photovoltaic (PV) facilities (or “projects”) and associated infrastructure for the Stilfontein PV Cluster. The Stilfontein Cluster is located ~20 km south-west of Potchefstroom and ~6 km north-east of Stilfontein, in the in the City of Matlosana and JB Marks Local Municipalities and Dr Kenneth Kaunda District Municipality (DKKDM) in North West Province (Figure 1-1). The Stilfontein Cluster lies within the Klerksdorp Renewable Energy Development Zone (REDZ).

A Basic Assessment (BA) process in terms of the National Environmental Management Act 107 of 1998, as amended (NEMA) and the EIA Regulations, 2014, as amended, is required to support an application for EA for the project(s). SRK Consulting (South Africa) (Pty) Ltd (SRK) was appointed by Mainstream to undertake the BA processes for each project in the Stilfontein PV Cluster.

Partners R Armstrong, P Aucamp, JS Bartels, CM Bauman, N Brien, LSE Coetser, CD Dalglish, IT Doku, BM Engelsman, R Gardiner, M Hinsch, SG Jones, W Jordaan, WC Joughin, DA Kilian, F Lake, JA Lake, LM Linzer, NG Macfarlane, V Maharaj, I Mahomed, JI Mainama, HAC Meintjes, MJ Morris, DH Mossop, GP Nel, RD O'Brien, VS Reddy, PJ Shepherd, T Shepherd, MJ Sim, JS Stiff, M van Huyssteen, AT van Zyl, MD Wanless, ML Wertz

Directors R Armstrong, V Maharaj, TJ McGurk, VS Reddy, T Shepherd, JS Stiff, AT van Zyl

Associate Partners PL Burmeister, LI Boshoff, T Claassen, SA de Villiers, M du Toit, AM Robertshaw, N Rump, LC Shand, LH Spies, JM Walls

Consultants JM Brown, *PrSci Nat*, JR Dixon, *PrEng*, GC Howell, *PrEng, PhD*, WC Joughin, *PrEng, MSc*, PR Labrum, *PrEng*, LM Linzer, *PrSci Nat, PhD*, SA Lorentz, *Agric. Eng, PhD*, RRW McNeill, *PrTech Eng*, HAC Meintjes, *PrEng, MSc*, PN Rosewarne, *PrSci Nat, MSc*, VM Simposya, *PrSci Nat*, TR Stacey, *PrEng, DSc*, PJ Terbrugge, *PrSci Nat, MSc*, HFJ Theart, *PrSci Nat, PhD*, DJ Venter, *PrTech Eng*, A Wood, *PrSci Nat, PhD*

Figure 1-1: Locality Map

Separate EAs are to be applied for the individual projects in the Stilfontein Cluster (as well as the associated grid connections):

- 9 x PV facilities, including 11-33 kV transmission lines, each including Battery Energy Storage Systems (BESS), and 9 x Independent Power Producer (IPP)-side on-site substations;
- 9 x Eskom-side on-site substations and 132 kV transmission lines to the Main Transmission Station (MTS); and
- 1 x MTS and 400 kV lines to existing Hermes Pluto transmission lines.

Figure 1-2: Components included in the individual BA processes for the Stilfontein Cluster

In terms of Regulation 16(1)(b)(v) of the NEMA EIA Regulation, 2014, an application for EA must include “the report generated by the national web based environmental screening tool”, and on 5 July 2019, notice was given that that the submission of such a report would be compulsory after 90 days of publication of this notice (i.e. by 4 October 2019 – GN R 960). As such, the national web based environmental screening report is hereby appended for the Stilfontein PV application.

2. Site Sensitivity Verification

The DFFE have advised that it is the responsibility of the Environmental Assessment Practitioner (EAP) to confirm whether these specialist studies will be conducted or provide a motivation as to why the specialist studies will not be conducted as part of the BA processes. SRK’s opinion in this regard (as presented below) and the proposed specialist studies were discussed and agreed on during the Pre-Application Meeting held on 1 March 2022.

This site sensitivity verification report relates specifically to Stilfontein PV project.

All specialists, except the Socio-Economic Specialist, conducted site visits in February 2022, and confirmed that it was the appropriate time and season to undertake a site visit to adequately verify the site sensitivity.

Figure 2-1: Photograph of the Stilfontein Cluster from the N12 highway

2.1 Site Sensitivity Verification

An indication of which specialist studies are to be undertaken and a motivation as to why certain specialist studies will not be undertaken, based on site verification, is provided in Table 2-1 below.

Table 2-1: Site sensitivity verification of the Stilfontein PV

Studies Required in Terms of the Screening Tool	Screening Sensitivity	Sensitivity Verification ¹	Reference / Motivation as to why not conducted
Agricultural Impact Assessment	Medium	Very Low	A soil and land capability study has been undertaken and identified that the agricultural sensitivity of the site is Very Low due to soil, slope, temperatures or rainfall. Non-arable land.
Landscape (solar) Impact Assessment	Very High	High	A Visual Impact Assessment has been undertaken and identified that the site is rated as High landscape (solar) sensitivity due to the proximity of residential areas and receptors, rural nature of the project area and the vast project area.
Archaeological and Cultural Heritage Impact Assessment	Very High	Low	The site is rated as Very High heritage sensitivity because it is located within 2 km of a Grade II heritage site and of very high paleontological sensitivity. A combined heritage study will be undertaken to address the archaeological and paleontological impact of the development.
Paleontology Impact Assessment	Very High		
Aquatic Biodiversity Impact Assessment	Very High	Very Low	The project site does not overlap with any areas classified as Aquatic Critical Biodiversity Areas (CBA). However, an Aquatic Biodiversity Impact Assessment report, nevertheless has been compiled confirming this.
Terrestrial Biodiversity Impact Assessment	Very High	High	Most of the project footprint is located within areas classified as Terrestrial Ecological Support Area (ESA) and Critical Biodiversity Area (CBA).
Plant Species Assessment	Medium	Medium	While no SCC were identified on the site, specialist confirmed that SCC are likely to be present in the habitats identified on site.
Animal Species Assessment	Medium	Medium	While no SCC were identified on the site, the specialist confirmed that SCC are likely to be present in the habitats identified on site, specifically the degraded and rocky habitats.
Avian Assessment	Low	High	An avian specialist has been appointed by the proponent to compile an impact assessment.
Geotechnical Assessment	N/A	N/A	The proponent will obtain geotechnical input for the design of the facility.
Socio-Economic Assessment	N/A	N/A	The development and operation of the facility may result in an increase in revenue and / or jobs and may have regional economic benefits. As such, SRK considers it necessary to conduct a Socio-Economic Impact Assessment.
Civil Aviation Assessment	Low	Insignificant	No major or other types of civil aviation aerodromes are located near the Stilfontein Cluster, therefore it is anticipated that impacts to civil aviation will be insignificant. Comments from relevant authorities, e.g. the SACAA, will be sought through the stakeholder engagement process.
Defence Assessment	Low	Insignificant	It is anticipated that impacts to defense will be insignificant. Comment from relevant authorities will be sought through the stakeholder engagement process.

¹ An EAP or specialist is only required to confirm the sites sensitivity (by means of "site sensitivity verification") for themes for which a Protocol exists, in accordance with the requirements set out in the relevant Protocol. Where N/A is indicated, there is no Protocol and therefore "site sensitivity verification" has not been provided, rather a motivation as to why no specialist study is required.

Studies Required in Terms of the Screening Tool	Screening Sensitivity	Sensitivity Verification ¹	Reference / Motivation as to why not conducted
Radio Frequency Interference (RFI)	Low	Insignificant	It is anticipated that impacts to civil aviation will be insignificant. However, comment from relevant authorities will be sought through the stakeholder engagement process.

3. Proposed Specialist Studies

To summarise, SRK has undertaken the following specialist studies to inform this project:

- Biodiversity Impact Assessment (including terrestrial and aquatic ecology);
- Soil and Land Capability Assessment;
- Socio-Economic Assessment;
- Heritage Assessment (including archaeology and palaeontology); and
- Visual Impact Assessment.

Yours faithfully,

SRK Consulting (South Africa) (Pty) Ltd

No intersections with EMF areas found.

Environmental screening results and assessment outcomes

The following sections contain a summary of any development incentives, restrictions, exclusions or prohibitions that apply to the proposed development footprint as well as the most environmental sensitive features on the footprint based on the footprint sensitivity screening results for the application classification that was selected. The application classification selected for this report is:

Relevant development incentives, restrictions, exclusions or prohibitions

The following development incentives, restrictions, exclusions or prohibitions and their implications that apply to this footprint are indicated below.

Incentive, restriction or prohibition	Implication
Strategic Transmission Corridor-Central corridor	https://screening.environment.gov.za/ScreeningDownloads/DevelopmentZones/Combined_EGI.pdf
Renewable energy development zones 10-Klerksdorp	https://screening.environment.gov.za/ScreeningDownloads/DevelopmentZones/Combined_REDZ.pdf

Proposed Development Area Environmental Sensitivity

The following summary of the development footprint environmental sensitivities is identified. Only the highest environmental sensitivity is indicated. The footprint environmental sensitivities for the proposed development footprint as identified, are indicative only and must be verified on site by a suitably qualified person before the specialist assessments identified below can be confirmed.

Theme	Very High sensitivity	High sensitivity	Medium sensitivity	Low sensitivity
Agriculture Theme			X	
Animal Species Theme			X	
Aquatic Biodiversity Theme	X			
Archaeological and Cultural Heritage Theme	X			
Avian Theme				X
Civil Aviation (Solar PV) Theme				X
Defence Theme				X
Landscape (Solar) Theme	X			
Paleontology Theme	X			
Plant Species Theme			X	
RFI Theme				X
Terrestrial Biodiversity Theme	X			

Specialist assessments identified

Based on the selected classification, and the known impacts associated with the proposed development, the following list of specialist assessments have been identified for inclusion in the assessment report. It is the responsibility of the EAP to confirm this list and to motivate in the assessment report, the reason for not including any of the identified specialist study including the provision of photographic evidence of the footprint situation.

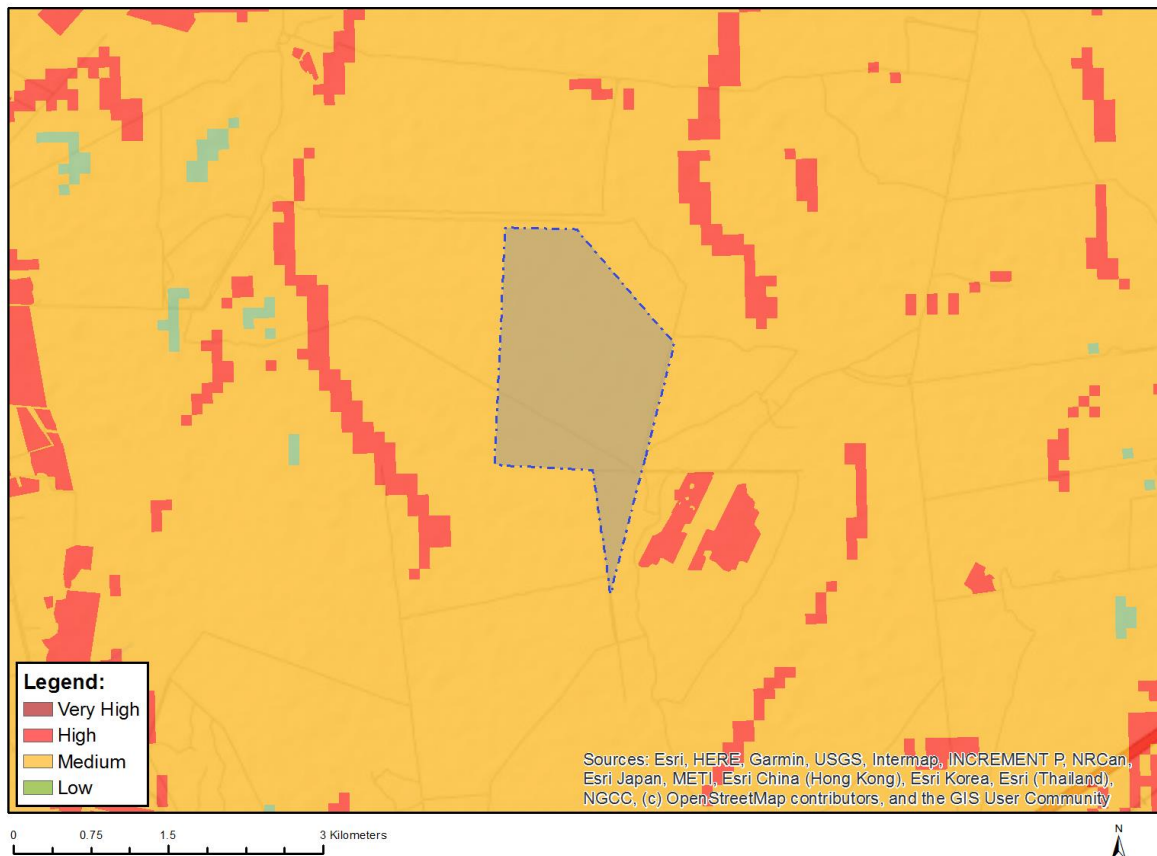

No	Specialist assessment	Assessment Protocol
1	Agricultural Impact Assessment	https://screening.environment.gov.za/ScreeningDownloads/AssessmentProtocols/Gazetted_WindAndSolar_Agriculture_Assessment_Protocols.pdf

Results of the environmental sensitivity of the proposed area.

The following section represents the results of the screening for environmental sensitivity of the proposed footprint for relevant environmental themes associated with the project classification. It is the duty of the EAP to ensure that the environmental themes provided by the screening tool are comprehensive and complete for the project. Refer to the disclaimer.
