Subject: FW: De Aar 2 South WEF - Full Final Layout for Confirmation of Acceptance

Dear Tilly

1. Please find my response relating to the wind turbine and access road layout dated 9 November 2022, as available in the KMZ file, titled: "20221109_Mulilo De Aar 2 South WEF Layout.kmz".
2. With the information at hand, there the only one location where there are potential receptors, relating to wind turbines 8, 9, 11, 12, 26 and 27. Of these, WTG 11 and 27 may be relocated, with the relocation moving these turbines slightly further away from the potential receptor. This move is insignificant in terms of noise and will not change the potential noise levels, nor the findings of the latest noise report. In terms of acoustics, this change in layout is acceptable.
3. This proposed layout will not change the findings of my latest noise report (Report no: HA-MDA2SWEF/ENIA/202210-Rev 2, dated October 2022), require additional, different or changes to the mitigation or management measures as proposed in the latest noise report.

Should you have any questions or queries, please do not hesitate to contact me.

Regards

Morné de Jager
