Subject: Impact Assessment for BOSA Transmission Interconnection Project - Meeting request
Attachments: BOSA Project Locality2_Reduced.jpg; Bosa A3P Madikwe_Reduced.jpg; BOSA Project Locality Wards_Reduced.jpg

Good day,

Aurecon has been appointed to undertake an Environmental and Social Impact Assessment (ESIA) study to assess and address environmental and social impacts associated with Botswana-South Africa (BOSA) Transmission Interconnection Project. A social assessment of the study area is required to inform the ESIA of the potential impacts posed by the construction and operational activities of the proposed project.

I would like to organise a meeting with the reserve manager to obtain input and look at how the proposed project will impact the reserve.

I am in the area next week with the public participation meetings and would like to sit down with him/her on Wednesday 19 July, as we are of the opinion that the reserve is a key stakeholder in this project.

Please see attached maps to give you a better understanding, our Public Participation Officer, Amelia Visagie will also send you more Background Information regarding the proposed project.

Please reply as soon as possible so that we can finalise the arrangements.

Kind regards,

Noeleen Greyling BA Environmental Management
