**THARISA MINERALS (PTY) LTD
CHANGES TO INFRASTRUCTURE AND OPERATIONS AT THE MINE**

UPDATE ON THE STATUS OF THE EIA PROCESS

Dear Ms Fihn

Tharisa Minerals (Pty) Ltd (Tharisa) produces chrome and platinum group metals (PGM) concentrate at Tharisa Mine near Marikana town.

In late 2011 Tharisa commissioned an environmental assessment process for various proposed developments including: a chrome sand drying plant; changes to the tailings dam design; and changes to the general surface infrastructure layout and operations. Since the distribution of the scoping report in June 2012, as part of its ongoing mine planning, Tharisa identified the need for an additional waste rock dump to handle the volume of waste rock produced by the open pit mining operations. The addition of the waste rock dump triggers new activities in terms of the 2010 EIA Regulations under the National Environmental Management Act, 107 of 1998 (NEMA). This change in project footprint also triggers the need to include the additional facilities under the Mineral and Petroleum Resources Development Act, 28 of 2008 (MPRDA). Instead of initiating a separate EIA process to cater for this change, it was decided in consultation with the relevant regulatory authorities to incorporate the new waste rock dump into the current EIA process and as such revise the scoping report and re-engage with interested and/or affected parties (IAPs) for the purposes of scoping.

This letter serves to notify you that the scoping report is being updated to address the change in project scope and will be available for public review in March 2014. A scoping report summary including details on the review process will be distributed to all IAPs registered on the project's IAP database. Should you wish to engage us on any related issues or should you wish to submit any comments in the meantime please contact Stella Moeketse at SLR via email (smoeketse@slrconsulting.com) or fax (011-467-0978) or phone (011-467-0945).
