As per AMAFA comment, the entrance canopy between the buildings was pulled back from the front edge to define the separation between 2 adjacent buildings.

Existing boundary wall demolition on hold pending AMAFA review.

ABOUT

Designworkshop is for the curious and the pioneering, for the rational, the free-thinking, and the autonomous, for the modern can-do spirit that drives invention. We embrace a best-of-both-worlds attitude, where learning from the past, respect for the land that raised us, resourcefulness, and simple functional authenticity, create the new, the real and the beautiful.
